AUTHOR INDEX TO VOLUME 148

A

Aaboubi, O. — A Thermoelectrochemical Transfer Function Analysis of Nickel Electrocrystallization in a Nonisothermal Cell. — O. Aaboubi, E. Merienne, J. Amblard, J.-P. Chopart, and A. Olivier; **149** (3), E90.

Aarik, Jaan — *see Forsgren, Katarina,* **149** (10), F139.

Aballe, A. — Noise Resistance Applied to Corrosion Measurements: VI. Partition of the Current Fluctuations Between the Electrodes. — A. Aballe and F. Huet; **149** (3), B89.

Abbassi, K. El — *see Cong, H. Nguyen,* **149** (5), A525.

Abdullah, A. M. — *see Sawford, M. K.,* **149** (6), B198.

Abe, Takeshi — *see Mogi, Ryo,* **149** (4), A385.
— *see Wang, Hongyu,* **149** (4), A499.
— *see Mogi, Ryo,* **149** (12), A1578.

Abernathy, C. R. — *see Harris, K. K.,* **149** (2), G128.
— *see Luo, B.,* **149** (4), G213.
— *see Luo, B.,* **149** (4), G236.
— *see Kim, J.,* **149** (8), G482.
— *see Luo, B.,* **149** (11), G613.

Abraham, D. P. — *see Andersson, A. M.,* **149** (10), A1358.

Abrardo, Joseph M. — *see Meixner, D. Laurence,* **149** (9), D132.

Adachi, Sadao — *see Tomita, Noriko,* **149** (4), G245.
— *see Sakaino, Kaoru,* **149** (9), G543.

Adebahr, J. — *see Georén, P.,* **149** (8), A1015.

Adesida, I. — *see Khan, F. A.,* **149** (7), G420.

Adjemian, K. T. — Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80-140°C. — K. T. Adjemian, S. J. Lee, S. Srinivasan, J. Benziger, and A. B. Bocarsly; **149** (3), A256.

Adler, S. B. — Reference Electrode Placement in Thin Solid Electrolytes. — S. B. Adler; **149** (5), E166.

Ado, Kazuaki — *see Tabuchi, Mitsuharu,* **149** (5), A509.

Afanas'ev, V. V. — *see Houssa, M.,* **149** (12), F181.

Aggour, M. — *see Lharch, M.,* **149** (5), C250.
— *see Yahyaoui, F.,* **149** (11), E472.

Ahmadi, Goodarz — *see Mazaheri, Ali R.,* **149** (7), G370.

Ahn, Byung Tae — *see Lee, Heui Seung,* **149** (1), G16.

Aiba, Yoshiro — *see Saito, Hiroyuki,* **149** (8), G494.

Aidla, Aleks — *see Forsgren, Katarina,* **149** (10), F139.

Aihara, Y. — A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte. — Y. Aihara, G. B. Appetecchi, and B. Scrosati; **149** (7), A849.

Aizawa, Kazuo — *see Yoo, Woo Sik,* **149** (7), G424.

Aizawa, M. — *see Sasaki, K.,* **149** (3), A227.

Akahoshi, Haruo — *see Arai, Juichi,* **149** (2), A217.

Akao, Noboru — *see Umebayashi, Rie,* **149** (3), B75.

Akbar, Sheikh — *see Singh, Amit,* **149** (3), E78.

Aksu, Serdar — The Role of Glycine in the Chemical Mechanical Planarization of Copper. — Serdar Aksu and Fiona M. Doyle; **149** (6), G352.
— Electrochemistry of Copper in Aqueous Ethylenediamine Solutions. — Serdar Aksu and Fiona M. Doyle; **149** (7), B340.

Albano, Maria A. — *see Sosnowski, Marek,* **149** (8), G474.

Albu, Titus V. — Dopants in Diamond Nanoparticles and Bulk Diamond. — Titus V. Albu, Alfred B. Anderson, and John C. Angus; **149** (5), E143.

Alcaide, Francisco — Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium. — Francisco Alcaide, Enric Brillas, and Pere-Lluís Cabot; **149** (2), E64.

Alcántara, R. — Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes below 1000°C. — R. Alcántara, J. M. Jiménez Mateos, and J. L. Tirado; **149** (2), A201.

Aldaz, A. — *see Iniesta, J.,* **149** (5), D57.

Aldinger, F. — *see Näfe, H.,* **149** (9), E311.

Alemany, C. — *see Tejedor, P.,* **149** (1), F4.

Alfantazi, A. M. — The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes. — A. M. Alfantazi and A. Shakshouki; **149** (10), C506.

Al-Kharafi, F. M. — Effect of Sulfides on the Electrochemical Impedance of Copper in Benzotriazole-Inhibited Media. — F. M. Al-Kharafi and B. G. Ateya; **149** (6), B206.

Alkire, Richard C. — *see Webb, Eric G.,* **149** (6), B272.
— *see Webb, Eric G.,* **149** (6), B280.
— *see Webb, Eric G.,* **149** (6), B286.
— *see Pricer, Timothy J.,* **149** (8), C396.
— *see Pricer, Timothy J.,* **149** (8), C406.

Allard, Lawrence F. — *see Jang, Young-Il,* **149** (11), A1442.

Allen, Jan L. — *see Xu, Kang,* **149** (5), A622.
— *see Xu, Kang,* **149** (8), A1079.

Allendorf, Mark D. — *see Spear, Karl E.,* **149** (12), B551.

Allums, K. K. — *see Luo, B.,* **149** (4), G213.
— *see Luo, B.,* **149** (4), G236.

Almanza-Workman, A. Marcia — Water Dispersible Silanes for Wettability Modification of Polysilicon. — A. Marcia Almanza-Workman, Srini Raghavan, Pierre Deymier, David J. Monk, and Ray Roop; **149** (1), H6.

Álvarez-Ruiz, B. — Role of the Metal and Surface Structure in the Electro-oxidation of Hydrazine in Acidic Media. — B. Álvarez-Ruiz, R. Gómez, J. M. Orts, and J. M. Feliu; **149** (3), D35.

Amadelli, R. — *see Velichenko, A. B.,* **149** (9), C445.

Amatucci, G. — Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries. — G. Amatucci and J.-M. Tarascon; **149** (12), K31.

Amatucci, G. G. — *see Pereira, N.,* **149** (3), A262.

Amatucci, Glenn G. — *see Du Pasquier, Aurelien,* **149** (3), A302.

Amazawa, Takao — *see Takahashi, Mitsutoshi,* **149** (11), B487.

Amblard, J. — *see Aaboubi, O.,* **149** (3), E90.

Amine, K. — *see Balasubramanian, M.,* **149** (9), A1246.
— *see Andersson, A. M.,* **149** (10), A1358.

Ammundsen, Brett — Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material. — Brett Ammundsen, Jens Paulsen, Isobel Davidson, Ru-Shi Liu, Chih-Hung Shen, Jin-Ming Chen, Ling-Yun Jang, and Jyh-Fu Lee; **149** (4), A431.

An, Hongmei — Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution. — Hongmei An, Shenhao Chen, Haitao Cui, and Xuegeng Yang; **149** (5), B174.

An, Kay Hyeok — High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole. — Kay Hyeok An, Kwan Ku Jeon, Jeong Ku Heo, Seong Chu Lim, Dong Jae Bae, and Young Hee Lee; **149** (8), A1058.

Anderson, Alfred B. — *see Albu, Titus V.,* **149** (5), E143.
— Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence. — Alfred B. Anderson and Nikolay M. Neshev; **149** (10), E383.

Anderson, Marc A. — *see Chin, Suk-Fun,* **149** (4), A379.

Anderson, Melody M. — *see Xu, Yuanhang,* **149** (4), H103.
— *see Xu, Yuanhang,* **149** (8), L5.

Anderson, Nicole — *see Stenger-Smith, John D.,* **149** (8), A973.

Andersson, A. M. — Surface Characterization of Electrodes from High Power Lithium-Ion Batteries. — A. M. Andersson, D. P. Abraham, R. Haasch, S. MacLaren, J. Liu, and K. Amine; **149** (10), A1358.

Andersson, Anna M. — *see Eriksson, Tom,* **149** (1), A69.

Andreas, H. A. — Composition, Structure, and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films. — H. A. Andreas and V. I. Birss; **149** (11), A1481.

Andreu, Rafael — *see Gil, María-Luisa A.,* **149** (2), E45.

Andreu, T. — *see Müller, C.,* **149** (11), C600.

Angell, C. A. — *see Özer, S.,* **149** (2), A87.

Angell, C. Austen — *see Xu, Kang,* **149** (7), A920.
— *see Xu, Kang,* **149** (8), L7.

Angus, John C. — *see Albu, Titus V.,* **149** (5), E143.

Anik, M. — Effect of pH on the Anodic Behavior of Tungsten. — M. Anik and K. Osseo-Asare; **149** (6), B224.

Antonova, I. V. — Characterization of Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction. — I. V. Antonova, V. P. Popov, J. Bak-Misiuk, and J. Z. Domagala; **149** (8), G490.

© 2002 The Electrochemical Society

Aono, Hiromichi — Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte. — Hiromichi Aono and Yoshihiko Sadaoka; **149** (6), H123.
Aonuma, Masayuki — *see Tanaka, Shin-ichi,* **149** (11), D167.

SUBJECT INDEX TO VOLUME 149

A

A-Hydroxy
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

AA2024
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510

AA2024-T3
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239

Ab
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

AB5-Type
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462

Ablated
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19

Ablation
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873

Abrasive
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Absorption
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
Monitoring of Hydrogen Absorption into Titanium Using Resistometry—**149** (9) B422
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305
X-Ray Absorption Study of $Li_xMn_yFe_{1-y}PO_4$ ($O<x<1, O<y<1$)—**149** (11) A1414
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

AC
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983

Acceleration
The Acceleration of Nonformaldehyde Electroless Copper Plating—**149** (12) C631

Acetonitrile
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46

Acid
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulphuric Acid—**149** (7) D97
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Electrochemical and Spectroelectrochemical Studies on Copolymerization of Diphenylamine with 2,5-Diaminobenzenesulfonic Acid—**149** (8) E298
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Acidic
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348

Acids
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

© 2001 The Electrochemical Society

Acoustic
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286

Activated
Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008

Activation
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Active
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118

Activities
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504

Activity
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299

Actuation
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281

Actuators
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146

Addition
Effects of the Addition of Silane during Carbonization on the Epitaxy of 3C-SiC on Si—**149** (9) G550

Additive
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406

Additives
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460
Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578

Adhesion
Adhesion of Alumina Particles to Thin Films—**149** (4) G239
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256

Adjacent
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

Adlayer
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19

Adlayers
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Adsorption
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
Transient Adsorption and Desorption in Micrometer Scale Features—**149** (8) G461
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131

Aeration
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211

Aerogels
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Ag
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Ag(100
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19

AgBr
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19

AgI-MO_2(M=Zr,Si)
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773

Aging
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59

Air
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119

Al
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339

Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196
Dealloying and Corrosion of Al Alloy 2024-T3—**149** (9) B428

Al-10
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75

Al-Cu
Electromigration in Nanometer Al-Cu Interconnect Lines—**149** (2) G103

Al/W
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23

Al_2O_3
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337

Al_2O_3-Coated *o*-$LiMnO_2$
Effect of Al_2O_3-Coated *o*-$LiMnO_2$ Cathodes Prepared at Various Temperatures on the 55°C-Cycling Behavior—**149** (2) A127

Al_2O_3/CaP
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79

$AlCl_3$
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261

Alcohol
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306

AlCu
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52

AlGaN/GaN
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Algorithms
Newton-Krylov-Multigrid Algorithms for Battery Simulation—**149** (10) A1342

Aliphatic
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46

Alkali
Electrochemical Properties of Alkali Metals in 1-Butyl-3-Methylimidazolium Hexafluorophosphate—**149** (6) E185
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273

Alkaline
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

Alkanethiol
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Alkyl
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Alkylphenols
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479

All-Solid-State
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376

Alloy
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Dealloying and Corrosion of Al Alloy 2024-T3—**149** (9) B428
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

Alloy-Coated
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75

Alloy-Graphite
TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635

Alloying
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Alloys
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Electrochemical Study of the Electroless Deposition of Co(P) and Co(W,P) Alloys—**149** (4) C187
Development and Characterization of Co-Ni Alloys for Microsystems Applications—**149** (4) C201
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
The Corrosion Behaviors of the Ternary $Mg_{2-x}Mm_xNi$ Alloys—**149** (5) A543
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510
Electrodeposition of Zn-Mn Alloys at Low Current Densities—**149** (11) C600
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Alloying
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27

Alternating
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242

$AlTiO_x$
RF Noise Characteristics of High-k $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69

Alumina
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Adhesion of Alumina Particles to Thin Films—**149** (4) G239
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Aluminosilicate
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607

Aluminosilicates
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Aluminum
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulphuric Acid—**149** (7) D97
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Ambient
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Ambigels
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Amino
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Ammonia
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293

Ammoniacal
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100

Amorphous
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Ionic Mobilities in Amorphous Anodic Titania—**149** (3) B70
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Electrochemistry of Nitrogen-Incorporated Hydrogenated Amorphous Carbon Films—**149** (7) E233
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464

Amorphous
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384

Amperometric
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173

Amphiphilic
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

AMPS
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

AMTEC
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Analogs
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Analysis
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Analyzed
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Anatase
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146

Angle
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103

Anhydrous
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

Aniline
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51

Anion
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137

Anions
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Anisotropic
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179

Anneal
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424

Annealed
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Annealing
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

Annihilation
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379

Anode
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598

Anode-Discharge
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178

Anodes
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466

Anodic
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Ionic Mobilities in Amorphous Anodic Titania—**149** (3) B70
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250
Effect of pH on the Anodic Behavior of Tungsten—**149** (6) B224
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497
A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Anodically
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398

Anodization
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362

Anodizing
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulphuric Acid—**149** (7) D97

Anomalous
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68
Understanding the Anomalous Capacity of Li/Li[$Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}$]$O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615

Anomaly
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Anticorrosion
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409

Antimonide
Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Antimony
Electrodeposition of Antimony Telluride—**149** (10) C474

Apatite
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134

Applications
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Apparatus
Electrochemical Vat Dyeing. Combination of an Electrolyzer with a Dyeing Apparatus—**149** (1) D7

Apparent
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Appended
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265

Applied
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89

Approach
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179

Aqueous
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Electrochemistry of Copper in Aqueous Ethylenediamine Solutions—**149** (7) B340
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Ar
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237

Arc
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234

Area
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

Areas
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

Aromatic
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Arrays
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357

Arsenic
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175

Artificial
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227

As-Doped
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Assembly
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554

Assessment
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Association
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242

Asterisks
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Asymmetric
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302

Atmosphere
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Atmospheric
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
Solid-State Electrochemical Probing of Atmospheric and Galvanic Corrosion—**149** (7) B328

Atomic
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Atoms
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Attempt
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622

Attempts
Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267

Au
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266

Au(100)
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Au(111)
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109
In Situ Study of Ultra-thin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Autocatalytic
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85

B

B-Doped
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39

B-site
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

B_2O_3
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65

$Ba(Mg_{1/3}Ta_{2/3})O_3$
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280

$(Ba,Sr)RuO_3$
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232

$(Ba,Sr)TiO_3$
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

$Ba_{0.5}Pr_{0.5}CoO_3$
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503

$Ba_2In_2O_5$
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381

$Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

$BaCeO_3$
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503

Back
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147

Back-side
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648

Back-Transfer
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31

$BaCoO_3$
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823

Band
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Bare
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479

Barrier
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

Base
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823

Based
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079
Effect of Electrolytes on Performance of Electrochemical Capacitors Based on Poly[3-(3,4-difluorophenyl)thiophene]—**149** (9) A1201
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

Bath
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effect of the Bath on Film Composition—**149** (1) C1
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390

Baths
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100

Batteries
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
Studies on Capacity Fade of Spinel-Based Li-Ion Batteries—**149** (1) A54
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The Li/$LiMn_3O_6$ Case—**149** (2) A212
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694
Optimized $LiMn_yFe_{1-y}PO_4$ as the Cathode for Lithium Batteries—**149** (6) A743
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Sulfone-Based Electrolytes for Lithium Ion Batteries—**149** (7) A920
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267
PEO-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes III. Test in Batteries—**149** (10) A1282
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437
Nano-FeS_2 for Commercial Li/FeS_2 Primary Batteries—**149** (11) A1499
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

Battery
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Study of $LiBF_4$ as an Electrolyte Salt for Li-Ion Battery—**149** (5) A586
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Characterization of the Lithium/Oxygen Organic Electrolyte Battery—**149** (9) A1190
Photovoltaically Self-Charging Battery—**149** (9) A1208
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Newton-Krylov-Multigrid Algorithms for Battery Simulation—**149** (10) A1342
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460
Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598

BEA
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

Beam
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432

Bending
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Benzene
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268

Benzotriazole
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Beta-SiC
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297

BF_2^+ Implant
Effect of Boron and BF_2^+ Implant on Polysilicon Resistors—**149** (4) G271

Bi_2Te_3
Insights into the Electrodeposition of Bi_2Te_3—**149** (11) C546

$Bi_2V_{0.9}Cu_{0.1}O_{5.35}$
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Bias-Enhanced
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114

Bifunctional
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092

Bilayer
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189

Binary
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Binder
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Biofilms
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130

Biomedical
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146

Bioreactor
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Bipolar
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905

Bismuth
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44

Bismuth-Modified
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483

Bis[(perfluoroalkyl)Sulfonyl]i
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Bleaching
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Blending
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855

Block
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610

Blocking
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406

Blue
Stable Blue Photoluminescence from Porous Silicon—**149** (1) C50
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Blue-Emitting
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165

Bonded
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Bonding
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51

Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161

Borate
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314

Boron
Effect of Boron and BF_2^+ Implant on Polysilicon Resistors—**149** (4) G271
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539

Boron-Doped
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179

Boronate
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460

Bottom-up
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109

Boundaries
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324

Boundary
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479

Br
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19

Brass
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130

Breakdown
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft *vs.* Hard-Gate Capacitors—**149** (10) F149

Bromide
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Bs
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642

Buffer
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155

Buffered
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117

Bulk
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Bumpy
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370

Buried
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184

C

C_{60}
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227

Cadmium
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348

Calcium
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Calculation
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413

Calorimetry
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

CaO-Gd_2O_3-Al_2O_3
Combinatorial Synthesis of Tb-Activated Phosphors in the CaO-Gd_2O_3-Al_2O_3 System—**149** (12) H183

Capability
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140

Capacitance
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591

Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008

Capacities
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370

Capacitive
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049

Capacitor
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

Capacitors
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
Reliability Characteristics of $W/WN/TaO_xN_y/SiO_2/Si$ Metal Oxide Semiconductor Capacitors—**149** (7) G403
Effect of Electrolytes on Performance of Electrochemical Capacitors Based on Poly{3-(3,4-difluorophenyl)thiophene}—**149** (9) A1201
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft *vs.* Hard-Gate Capacitors—**149** (10) F149
Effect of Top Electrode Deposition Condition on Polarization Fatigue of $RuO_2/Pb(Zr,Ti)O_3/RuO_2$ Thin Film Capacitors—**149** (10) F152
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

Capacity
Studies on Capacity Fade of Spinel-Based Li-Ion Batteries—**149** (1) A54
A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Understanding the Anomalous Capacity of $Li/Li[Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}]O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^7Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

Carbide
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

Carbon
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Electrochemical Sensor for Dissolved Carbon Dioxide Measurement—**149** (1) H28
Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35
Low-Temperature Characterization of Lithium-Ion Carbon anodes via Microperturbation Measurement—**149** (6) A754
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Electrochemical Reduction of Dihalo-2,2′-bithiophenes at Carbon Cathodes in Dimethylformamide—**149** (6) E222
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Electrochemistry of Nitrogen-Incorporated Hydrogenated Amorphous Carbon Films—**149** (7) E233
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113
Reducing Carbon in $LiFePO_4/C$ Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383

Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479

Carbon-Coated
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598

Carbon-Free
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89

Carbon-PTFE
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64

Carbon-Supported
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Carbon/Polyelectrolyte
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541

Carbonate
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
In Situ Study of Ultra-thin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578

Carbonate-Based
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69

Carbonates
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Carbonization
Effects of the Addition of Silane during Carbonization on the Epitaxy of 3C-SiC on Si—**149** (9) G550

Carbons
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

Carboxylic
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46

Carlo
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406

Case
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The $Li/LiMn_3O_6$ Case—**149** (2) A212

Catalyst
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466

Catalyst-Enhanced
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109

Catalysts
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Catalytic
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504

Catalyzation
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143

Cathode
Novel High Rate Lithium Intercalation Cathode Materials—**149** (2) A99
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448

Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Optimized $LiMn_yFe_{1-y}PO_4$ as the Cathode for Lithium Batteries—**149** (6) A743
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
Synthesis and Electrochemical Characteristics of $Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$ Cathode Materials—**149** (9) A1250
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509

Cathodes
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Effect of Al_2O_3-Coated *o*-$LiMnO_2$ Cathodes Prepared at Various Temperatures on the 55°C-Cycling Behavior—**149** (2) A127
Synthesis and Electrochemical Properties of $LiCo_2O_4$ Spinel Cathodes—**149** (2) A162
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
Electrochemical Reduction of Dihalo-2,2′-bithiophenes at Carbon Cathodes in Dimethylformamide—**149** (6) E222
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
High-Voltage Cycling Behavior of Thin-Film $LiCoO_2$ Cathodes—**149** (11) A1442
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Cathodic
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389
Cathodic Inhibition Effects during NiFe and ZnNi Alloy Deposition—**149** (11) C567

Cathodoluminescence
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44
Cathodoluminescence and Photoluminescence of Nanocrystal Phosphors—**149** (3) H72
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Cation
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Cation Composition Control of MOCVD (Ba,Sr)TiO_3 Thin Films along a Capacitor Hole—**149** (10) G585
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Cation-Selective
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21

Cavities
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497

$CaZr_{0.9}In_{0.1}O_{3-\delta}$
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104

CBD-In$(OH)_xS_y$
Growth Mechanism of CBD-In$(OH)_xS_y$ thin Films—**149** (1) C59

Cd
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

$(CdS)_{1-x-y}(ZnS)_xSi_y$
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317

CdTe/CdS
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147

Ce(III)
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47

Ce-$HClO_4$-H_2O
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Ce^{4+}/Ce^{3+}-V^{2+}/V^{3+}
Studies of the Feasibility of a Ce^{4+}/Ce^{3+}-V^{2+}/V^{3+} Redox Cell—**149** (4) A426

Cell
The Inverted p-Diamond/n-CdTe Heterojunction Solar Cell—**149** (1) G55
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2 Cell—**149** (2) A87
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195

Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206
The Electrochemical Reduction of Co_3O_4 in a Lithium Cell—**149** (3) A234
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90
Studies of the Feasibility of a Ce^{4+}/Ce^{3+}-V^{2+}/V^{3+} Redox Cell—**149** (4) A426
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Cells

High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2—**149** (2) A87
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Understanding the Anomalous Capacity of Li/$Li[Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}]O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Influence of Depth-Inhomogeniety of Lifetime in Silicon Solar Cells—**149** (9) G522
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Centrifugal

Intensification of Water Electrolysis in a Centrifugal Field—**149** (11) D172

CeO_2

Electronic Conductivity of 20 mol % $YO_{1.5}$ Doped CeO_2—**149** (11) E450

Ceramic
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Ceramic-Polymer
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21

Ceramics
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455

Ceria
On the Conductivity Mechanism of Nanocrystalline Ceria—**149** (10) J73
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466

Cerium
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Cermet
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175

CF_4-Ar
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

CF_4/O_2
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297

CFC-12
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182

Chain
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Changes
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498

Channel
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441

Channels
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394

Characteristics
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367
Reliability Characteristics of W/WN/TaO_xN_y/SiO_2/Si Metal Oxide Semiconductor Capacitors—**149** (7) G403
Synthesis and Electrochemical Characteristics of $Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$ Cathode Materials—**149** (9) A1250
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Characterization
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483

Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Development and Characterization of Co-Ni Alloys for Microsystems Applications—**149** (4) C201
Electrodeposition and Characterization of Manganese Coatings—**149** (4) C209
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318
Low-Temperature Characterization of Lithium-Ion Carbon anodes via Microperturbation Measurement—**149** (6) A754
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
Poly (ethylene oxide)-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable Ti/TiO_2/Pt Electrode—**149** (7) B306
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490
Characterization of the Lithium/Oxygen Organic Electrolyte Battery—**149** (9) A1190
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Characteristics

Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226

Characterization

Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297

Charge

A Study on the Preparation of NiOx Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Charge/Discharge

Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804

Charging

Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478

Charging/Discharging

Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93

Chemical

Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Structural Stability of Metallorganic Chemical Vapor Deposited (Ba,Sr)RuO_3 Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232

On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
The Role of Glycine in the Chemical Mechanical Planarization of Copper—**149** (6) G352
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Chemical Vapor Deposited RuO_x Films Effect of Oxygen Flow Rate—**149** (9) G510
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Chemically
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Chemicals
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125

Chemiluminescence
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137

Chemistry
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Chip
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Chloroaluminate
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268

Chloride
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Chloride-I-ethyl-3-Methylimida
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348

Chlorides
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273

Chloriding
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98

Chloro-Aluminate
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115

Chloroacetonitrile
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113

Chloroaluminate
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371

Chlorosilanes
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112

Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120

Choline
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543

Chromate
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357

Chromium
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379

Circuit
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Citrate
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100

Cl
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19

Cl_2
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123

Cl_2-Based
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420

Cl_2/SF_6-Electron
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280

Clay
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Clean
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63

Cleaning
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336

Cluster
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474

CMOS
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

CMP
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336

CO
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297

Co
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274

CO
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868

Co
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

CO
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Co(P)
Electrochemical Study of the Electroless Deposition of Co(P) and Co(W,P) Alloys—**149** (4) C187

Co(Ru)/Ru
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469

Co(W,P)
Electrochemical Study of the Electroless Deposition of Co(P) and Co(W,P) Alloys—**149** (4) C187

Co-Free
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462

Co-Ni
Development and Characterization of Co-Ni Alloys for Microsystems Applications—**149** (4) C201

Co-Ni-Cu/Cu
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218

Co/Cu
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439

CO_2
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479

Co^{2+}
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159

Co_3O_4
The Electrochemical Reduction of Co_3O_4 in a Lithium Cell—**149** (3) A234

Coalescence
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71

Coated
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403

Coating
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Coatings
Electrodeposition and Characterization of Manganese Coatings—**149** (4) C209
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

Cobalt
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Codeposition
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555
Kinetics of Particle Codeposition of Nanocomposites—**149** (11) C610
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615

Conductivities
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292

Coefficient
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307

Coefficients
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424

Coercivity
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18

CoFeB
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375

Coke
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834

Cold-Working
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534

Collapse
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Collector
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185

Collectors
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339

Combination
Electrochemical Vat Dyeing. Combination of an Electrolyzer with a Dyeing Apparatus—**149** (1) D7
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

Combinatorial
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85
Combinatorial Synthesis of Tb-Activated Phosphors in the CaO-Gd_2O_3-Al_2O_3 System—**149** (12) H183

Combined
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

Commensurate
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45

Commercial
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Nano-FeS_2 for Commercial Li/FeS_2 Primary Batteries—**149** (11) A1499

Common
Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Compared
Transient Quarts Crystal Microbalance Behaviors Compared—**149** (1) H33

Comparison
Comparison of Photoelectrochromic Devices with Different Layer Configurations—**149** (9) H159
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Comparisons
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898

Compatibility
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

Competition
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331

Complementary
An Oxynitride Gate Dielectric for Sub-30 A Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532

Complex
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265

Complexes
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89

Components
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607

Composed
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546

Composite
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414
TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79
Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Composites
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616

Composition
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Microroughness and Composition of Cyanide Treated $CuInS_2$—**149** (1) G77
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481

Compositionally
Electrodeposition of FeCoNiCu/Cu Compositionally Modulated Multilayers—**149** (6) C349

Compound
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355

Compound $(Sr_{0.99}La_{1.01})Zn_{0.99}O_{3.495}$
Luminescent Property of Eu^{3+} in a New Compound, $(Sr_{0.99}La_{1.01})Zn_{0.99}O_{3.495}$—**149** (3) H68

Compounds
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

Computational
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418

Concentration
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252
Concentration Polarization of a Polymer Electrolyte—**149** (8) A1015

Concept
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Condition
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Effect of Top Electrode Deposition Condition on Polarization Fatigue of RuO_2/Pb(Zr,Ti)O_3/RuO_2 Thin Film Capacitors—**149** (10) F152

Conditions
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Conducting
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_2O_x$ Thin Films—**149** (6) H113
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
in Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Conduction
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_2O_x$ Thin Films—**149** (6) H113
Determination of the p-Electron Conduction Parameter of Na-beta-Alumina by Potentiometric Measurements—**149** (9) E311

Conductive
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26

Conductivity
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCoO_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
On the Conductivity Mechanism of Nanocrystalline Ceria—**149** (10) J73
Electronic Conductivity of 20 mol % $YO_{1.5}$ Doped CeO_2—**149** (11) E450
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

Configuration
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Configurations
Comparison of Photoelectrochromic Devices with Different Layer Configurations—**149** (9) H159

Confocal
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Conformal
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Conformation
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394

CoNiFe
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642

Considerations
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Constant
Structural Stability of Metallorganic Chemical Vapor Deposited (Ba,Sr)RuO_3 Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145

Constants
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116

Constraints
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180

Contact
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266

Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Contacts
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367

Contaminants
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301

Contamination
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198

Contribution
A Contribution to the Study of the Electroreduction of 2,4-Diamino-1,3,5-triazine on Mercury Electrodes—**149** (8) E306
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

Control
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

Controlled
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248

Convection
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6

Convenient
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385

Conversion
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466

Copolymer
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Copolymer-Templated
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610

Copolymerization
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Electrochemical and Spectroelectrochemical Studies on Copolymerization of Diphenylamine with 2,5-Diaminobenzenesulfonic Acid—**149** (8) E298
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521

Copper
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Feature Superfilling in Copper Electrochemical Deposition—**149** (1) C74
Physics of Copper in Silicon—**149** (1) G21
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Intrinsic Gettering of Copper in Silicon Wafers—**149** (6) G343
The Role of Glycine in the Chemical Mechanical Planarization of Copper—**149** (6) G352
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
Electrochemistry of Copper in Aqueous Ethylenediamine Solutions—**149** (7) B340
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Interactions Between Nanoporous Silica and Copper—**149** (9) F122
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620
The Acceleration of Nonformaldehyde Electroless Copper Plating—**149** (12) C631
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Copper(II)Solutions
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Copper-Gold
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27

Copper-Nickel
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479

Copper-Oxide
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41

Cor
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Correlation
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567

Corrin-Polyion
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Corrosion
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146
The Corrosion Behaviors of the Ternary $Mg_{2-x}Mm_xNi$ Alloys—**149** (5) A543
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
The Role of Oxygen on the Stability of Crevice Corrosion—**149** (6) B198
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
Solid-State Electrochemical Probing of Atmospheric and Galvanic Corrosion—**149** (7) B328
Mechanisms of Metal Dusting Corrosion of Iron—**149** (7) B348
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414
Dealloying and Corrosion of Al Alloy 2024-T3—**149** (9) B428
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551
Oxide/Polypyrrole composite Films for Corrosion Protection of Iron—**149** (12) B560

Corrosion-Driven
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154

Corrosion-Related
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379

$CoSi_2$
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16

Cosolvent
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Cosolvents
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361

Couple
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

Coupled
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

Coupling
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143

Covalence
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^{7}Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

Coverage
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Covered
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357

Cr(VI)
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47

Cr-Mo
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

Cr-Zr
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

Cracking
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398

Crevice
The Role of Oxygen on the Stability of Crevice Corrosion—**149** (6) B198
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440

Critical
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
The Dealloying Critical Potential—**149** (8) B370

CrN
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234

Crossover
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

Crystal
Transient Quarts Crystal Microbalance Behaviors Compared—**149** (1) H33
The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642

Crystalline
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Crystallite
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114

Crystallized
Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391

Crystals
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331

Cu
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408

Cu(110)
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Cu-Al
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268

Cu-Co
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363

Cu-Fluorinated
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43

Cu-Nanostructures
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432

Cu-NH_3
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390

Cu-Ni
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247

Cu/Organosilicate
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43

Cu/TiN/Ti/FSG
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Cu/TiN/Ti/Hydrogen
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455

Cu/TiN/Ti/OSG
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Cu/TiN/Ti/Thermal
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455

Cu_{19}/Cu
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195

Cu_2O
The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251

Cubic
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

$CuInS_2$
Microroughness and Composition of Cyanide Treated $CuInS_2$—**149** (1) G77

Cupric
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Cuprous
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Curing
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9

Current
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498
Electrodeposition of Zn-Mn Alloys at Low Current Densities—**149** (11) C600
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Current-Voltage
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227

Currents
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65

Curved
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413

CVD
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Cyanide
Microroughness and Composition of Cyanide Treated $CuInS_2$—**149** (1) G77

Cyanoacetic
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113

Cyclability
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472

Cycle
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
Cycle Performance in Each State-of-Charge in $LiMn_2O_4$—**149** (12) A1514

Cyclic
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Cylinder
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cylinder Electrode—**149** (6) B248

Cycling
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349

High-Voltage Cycling Behavior of Thin-Film $LiCoO_2$ Cathodes—**149** (11) A1442

Cyclopentadienyl-Propylcyclope
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317

Cyclotron
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487

Czochralski
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379

Czochralski-Grown
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

D

Damage
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131

Damascene
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Data
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265

DC
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

DC-Polarization
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104

Dealloying
The De-Alloying Critical Potential—**149** (8) B370
Dealloying and Corrosion of Al Alloy 2024-T3—**149** (9) B428

Decaborane
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474

Decomposition
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261

Deep
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286

Defect
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59
Defect Generation in Ultrathin $SiON/ZrO_2$ Gate Dielectric Stacks—**149** (12) F181

Defects
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379

Deflection
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79

Degradation
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

Deintercalation
Lithium Electrochemical Deintercalation from 02-$LiCo0_2$. Structure and Physical Properties—**149** (10) A1310

Delamination
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154

Delignification
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15

Delithiated
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401

Delta
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125

Dense
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Densification
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

Densities
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535
Electrodeposition of Zn-Mn Alloys at Low Current Densities—**149** (11) C600

Density
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Dependence
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394

Depending
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834

Depleted
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Deposit
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168

Deposited
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393
Magnetic Properties of the Electrochemically Deposited Ni/Cu Superlattices—**149** (11) C607
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Deposition
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68
Feature Superfilling in Copper Electrochemical Deposition—**149** (1) C74
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Electrochemical Study of the Electroless Deposition of Co(P) and Co(W,P) Alloys—**149** (4) C187
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306

Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529
Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139
Effect of Top Electrode Deposition Condition on Polarization Fatigue of RuO_2/Pb(Zr,Ti)O_3/RuO_2 Thin Film Capacitors—**149** (10) F152
Cathodic Inhibition Effects during NiFe and ZnNi Alloy Deposition—**149** (11) C567
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Deposits
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57

Depth-Inhomogeniety
Influence of Depth-Inhomogeniety of Lifetime in Silicon Solar Cells—**149** (9) G522

Depths
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

Derivative
Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402

Derived
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481

Design
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385

Designed
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174

Desorption
Transient Adsorption and Desorption in Micrometer Scale Features—**149** (8) G461

Destruction
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187

Detection
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Detection of Metal Segregation at the oxide-Silicon Interface—**149** (7) G429
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Determination
Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252
Determination of the p-Electron Conduction Parameter of Na-beta-Alumina by Potentiometric Measurements—**149** (9) E311
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541

Deuterium
Interface Hardening with Deuterium Implantation—**149** (8) G446

Development
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
Development and Characterization of Co-Ni Alloys for Microsystems Applications—**149** (4) C201
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Deviation
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223

Deviations
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Device
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Devices
Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Comparison of Photoelectrochromic Devices with Different Layer Configurations—**149** (9) H159
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Diagram
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Diagrams
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638

Diamond
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
AC *vs.*DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179

Dielectric
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Structural Stability of Metallorganic Chemical Vapor Deposited (Ba,Sr)RuO_3 Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
The Use of Unsaturated Fluorocarbons for Dielectric Etch Applications—**149** (4) G276
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Dielectrics
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69

Diethyl
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286

Differential
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211

Differently
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Diffraction
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
Understanding the Anomalous Capacity of $Li/Li[Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}]O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490

Diffusion
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424

Diffusivity
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40

Dihalo-2,2′-bithiophenes
Electrochemical Reduction of Dihalo-2,2′-bithiophenes at Carbon Cathodes in Dimethylformamide—**149** (6) E222

Dilute
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246

Dimensional
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180

Dimensionally
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable $Ti/TiO_2/Pt$ Electrode—**149** (7) B306

Dimensions
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

Dimerization
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45

Dimethyl
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127

Dimethylformamide
Electrochemical Reduction of Dihalo-2,2′-bithiophenes at Carbon Cathodes in Dimethylformamide—**149** (6) E222

Diodes
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Dioxide
Electrochemical Sensor for Dissolved Carbon Dioxide Measurement—**149** (1) H28
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497

Dioxides
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112

Diphenylamine
Electrochemical and Spectroelectrochemical Studies on Copolymerization of Diphenylamine with 2,5-Diaminobenzenesulfonic Acid—**149** (8) E298

Dipolar
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Direct
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448

Disc
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289

Discharge
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616

Discharges
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218

Dishing
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41

Disk
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Dispersed
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13

Dispersible
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6

Displacement
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309

Display
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44

Displayed
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627

Dissolution
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250
In Situ Local Dissolution of Duplex Stainless Steels in $1MH_2SO_4$ + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440
The Role of Low-Dimensional Systems in Electrochemical Phase Formation and Dissolution Processes—**149** (12) K47

Dissolved
Electrochemical Sensor for Dissolved Carbon Dioxide Measurement—**149** (1) H28
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834

Distribution
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498

DMFC
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

Dodecylsulfate
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314

Dopant
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51

Dopants
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

Doped
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Electronic Conductivity of 20 mol % $YO_{1.5}$ Doped CeO_2—**149** (11) E450

Doping
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

Double
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229

Double-Layer
Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

Downstream
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297

Drag
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

Dram
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226

Driven
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248

Dry
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620

Dual
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Duplex
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187

Dusting
Mechanisms of Metal Dusting Corrosion of Iron—**149** (7) B348

Dye
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146

Dye-Sensitized
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413

Dyeing
Electrochemical Vat Dyeing. Combination of an Electrolyzer with a Dyeing Apparatus—**149** (1) D7

E

E-pH
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Each
Cycle Performance in Each State-of-Charge in $LiMn_2O_4$—**149** (12) A1514

Early
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34

EC-PC-EMC
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

ECR-Sputtered
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479

EDTA-Based
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405

Effectiveness
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280

Effects
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1

Efficiency
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879

Electric
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45
Electric Fields Produced by High-Temperature Metal Oxidation—**149** (1) J11
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

Electrical
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable Ti/TiO_2/Pt Electrode—**149** (7) B306
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Electro-osmotic
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

Electro-oxidation
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383

Electroactivity
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Electroanalysis
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179

Electroanalytical
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

Electrocatalysis
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525

Electrocatalysts
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Electrocatalytic
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299

Electrocrystallization
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90

Electrode
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable Ti/TiO_2/Pt Electrode—**149** (7) B306
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058
T2 and 02 $Li_{2/3}[Co_xNi_{1/3-x/2}Mn_{2/3-x/2}]O_2$ Electrode Materials—**149** (8) A1083
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
Effect of Top Electrode Deposition Condition on Polarization Fatigue of $RuO_2/Pb(Zr,Ti)O_3/RuO_2$ Thin Film Capacitors—**149** (10) F152
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521

Electrode-Supported
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325

Electrode/Electrolyte
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Electrodeposit
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370

Electrodeposited
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469

Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479

Electrodeposition

Electrodeposition of Tin Needle-Like Structures—**149** (3) C150
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96
Electrodeposition and Characterization of Manganese Coatings—**149** (4) C209
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
Electrodeposition of FeCoNiCu/Cu Compositionally Modulated Multilayers—**149** (6) C349
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Superconformal Electrodeposition of Silver in Submicrometer Features—**149** (8) C423
Selective Electrodeposition of Cu Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Electrodeposition of Antimony Telluride—**149** (10) C474
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498
A Simplified Method for WO_3 Electrodeposition—**149** (11) C539
Insights into the Electrodeposition of Bi_2Te_3—**149** (11) C546
Electrodeposition of Zn-Mn Alloys at Low Current Densities—**149** (11) C600
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Electrodes

Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloroaluminate Molten Salts Containing Benzene—**149** (5) C268
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118
A Contribution to the Study of the Electroreduction of 2,4-Diamino-1,3,5-triazine on Mercury Electrodes—**149** (8) E306
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196
Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Electrodissolution
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457

Electrogenerated
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137

Electroinsertion
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546

Electroless
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27
Electrochemical Study of the Electroless Deposition of Co(P) and Co(W,P) Alloys—**149** (4) C187
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
The Acceleration of Nonformaldehyde Electroless Copper Plating—**149** (12) C631

Electroless-Deposited
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147

Electroluminescence
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250

Electrolyzer
Electrochemical Vat Dyeing. Combination of an Electrolyzer with a Dyeing Apparatus—**149** (1) D7

Electrolysis
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Intensification of Water Electrolysis in a Centrifugal Field—**149** (11) D172
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178

Electrolyte
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2—**149** (2) A87
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418
Study of $LiBF_4$ as an Electrolyte Salt for Li-Ion Battery—**149** (5) A586
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Concentration Polarization of a Polymer Electrolyte—**149** (8) A1015
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Characterization of the Lithium/Oxygen Organic Electrolyte Battery—**149** (9) A1190
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Electrolytes
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The Li/$LiMn_3O_6$ Case—**149** (2) A212

Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26
A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107
Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667
Poly (ethylene oxide)-LiN($SO_2CF_2CF_3$)$_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891
Sulfone-Based Electrolytes for Lithium Ion Batteries—**149** (7) A920
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
All Solid-State Li/Li$_x$$MnO_2$ Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121
Effect of Electrolytes on Performance of Electrochemical Capacitors Based on Poly[3-(3,4-difluorophenyl)thiophene]—**149** (9) A1201
Intermolecular Interactions in Lactone-Based Electrolytes—**149** (9) E340
PEO-LiN($SO_2CF_2CF_3$)$_2$ Polymer Electrolytes III. Test in Batteries—**149** (10) A1282
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Electrolytic
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Electrolyzers
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

Electromigration
Electromigration in Nanometer Al-Cu Interconnect Lines—**149** (2) G103
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408

Electron
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

Electron-Beam
Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391

Electron-Transfer
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12

Electronic
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Electronic Conductivity of 20 mol % $YO_{1.5}$ Doped CeO_2—**149** (11) E450
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541

Electroplated
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642

Electroplating
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}$(Co_2Z)-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Electroreduction
A Contribution to the Study of the Electroreduction of 2,4-Diamino-1,3,5-triazine on Mercury Electrodes—**149** (8) E306
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Electrospray
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Electrostatic
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146

Electrosynthesis
Electrosynthesis and Physicochemical Properties of PbO_2 Films—**149** (9) C445

Electrowinning
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506

Elements
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Electrolyte
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Elevated
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Eliminate
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Eliminates
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195

Ellipsometric
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491

Embedded
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100

EMIF·2.3HF
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1

Emission
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293

Emitting
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Energetic
High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27

Energy
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539

Energy-Transfer
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31

Enhanced
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474

Enhancement
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773

Enhancing
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

Entropy
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493

Environment
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297

Environmental
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198

Environments
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Epitaxial
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526

Epitaxy
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Effects of the Addition of Silane during Carbonization on the Epitaxy of 3C-SiC on Si—**149** (9) G550

Epoxy-Vinyl
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Erosion
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41

ESD
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19

Esters
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361

Estimate
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385

Estimation
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

Etch
The Use of Unsaturated Fluorocarbons for Dielectric Etch Applications—**149** (4) G276

Etched
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543

Etching
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Ethanoic
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331

Ethanol
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272

Ether
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127

Ethylenediamine
Electrochemistry of Copper in Aqueous Ethylenediamine Solutions—**149** (7) B340

Eu^{3+}
Luminescent Property of Eu^{3+} in a New Compound, $(Sr_{0.99}La_{1.01})Zn_{0.99}O_{3.495}$—**149** (3) H68
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134

Eutectic
Electrochemical Behavior of Hydride Ion in a LiCl-KCl Eutectic Melt—**149** (5) E159

Evaporation
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29

Evidence
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83

Evolution
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

EW
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

Examination
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, andSi(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194

Examined
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Examining
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140

Exceptionally
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19

Exchange
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424

Excimer
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Expansion
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Experiment
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Experimental
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Experiments
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898

Exposed
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97

Exposure
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Extent
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1

Extra
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627

Extraction
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842

Extruded
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

F

Fabric
Capacitance Enhancement of Carbon Fabric Electrodes in Electrochemical Capacitors Through Electrodeposition with Copper—**149** (5) A591

Fabricate
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Microelectromechanical Systems and Electrochemical Applications—**149** (3) E78

Fabricated
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988

Fabrication
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179

Faces
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526

Factors
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Fade
Studies on Capacity Fade of Spinel-Based Li-Ion Batteries—**149** (1) A54
A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574

Fading
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326

Fatigue
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Effect of Top Electrode Deposition Condition on Polarization Fatigue of $RuO_2/Pb(Zr,Ti)O_3/RuO_2$ Thin Film Capacitors—**149** (10) F152

Fault
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73

Fe-Cr-Mo-C-B-P
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366

Fe-Doped
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 (0.15<Fe/(Fe+Mn)<0.75) as a Novel 4 V Positive Electrode Material—**149** (5) A509

$Fe_4(P_2O_7)_3.nH_2O$
Hydrated Iron Phosphates $FePO_4$.nH2O and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Feasibility
Studies of the Feasibility of a Ce^{4+}/Ce^{3+}-V^{2+}/V^{3+} Redox Cell—**149** (4) A426
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Feature
Feature Superfilling in Copper Electrochemical Deposition—**149** (1) C74

Features
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Superconformal Electrodeposition of Silver in Submicrometer Features—**149** (8) C423
Transient Adsorption and Desorption in Micrometer Scale Features—**149** (8) G461

FeCoNiCu/Cu
Electrodeposition of FeCoNiCu/Cu Compositionally Modulated Multilayers—**149** (6) C349

FeNi
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68

FeO
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503

$FePO_4$
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297

$FePO_4.nH_2O$
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Ferrocene
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

FeS_2
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Fiber
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383

Fibers
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855

Field
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Intensification of Water Electrolysis in a Centrifugal Field—**149** (11) D172

Field-Emission
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Fields
Electric Fields Produced by High-Temperature Metal Oxidation—**149** (1) J11

Filiform
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403

Filling
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Film
Impedance Studies of the Thin Film $LiMn_2O_4$/Electrolyte Interface—**149** (1) A61
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464
Effect of Top Electrode Deposition Condition on Polarization Fatigue of RuO_2/Pb(Zr,Ti)O_3/RuO_2 Thin Film Capacitors—**149** (10) F152
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479

Films

ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19

Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4

Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1

Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10

Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18

Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23

Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28

Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33

Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44

Growth Mechanism of CBD-$In(OH)_xS_y$ thin Films—**149** (1) C59

Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68

Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4

Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51

Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85

Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89

Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1

Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19

Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89

Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128

Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97

Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27

Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9

Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81

Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379

Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123

Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232

Adhesion of Alumina Particles to Thin Films—**149** (4) G239

RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597

Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274

A Photoelectrochemical Study of $In_xGa_{1-x}N$ Films—**149** (5) E173

Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35

Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301

Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306

Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311

Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317

Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345

The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113

Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321

Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363

Electrochemistry of Nitrogen-Incorporated Hydrogenated Amorphous Carbon Films—**149** (7) E233

Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76

Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384

Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399

Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92

Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153

Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398

A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450

Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439

Electrosynthesis and Physicochemical Properties of PbO_2 Films—**149** (9) C445

Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331

Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103

Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116

Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510

The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535

Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465

Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148

Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394

Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402

Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139

Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481

Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487

Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

Oxide/Polypyrrole composite Films for Corrosion Protection of Iron—**149** (12) B560

Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642

Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Fine
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688

Fine-Line
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

First
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431

Flame-Retarding
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Flat
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-nanometer Surfaces—**149** (12) E479

Flow
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Fluctuations
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89

Fluoride
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Fluorinated
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079

Fluorine
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Fluorocarbon
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318

Fluorocarbons
The Use of Unsaturated Fluorocarbons for Dielectric Etch Applications—**149** (4) G276

Focused
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432

Foils
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulfuric Acid—**149** (7) D97

Formation
Characterization Chromate Conversion Coating Formation and Breakdown Using Electrode Arrays—**149** (8) B357

Force
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Formation
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Random and Ordered Macropore Formation in p-Type Silicon—**149** (1) G70
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

The Role of Low-Dimensional Systems in Electrochemical Phase Formation and Dissolution Processes—**149** (12) K47

Forming
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65

Formulate
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622

Framework
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710

Frank-van
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Free
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374

Free-Surface
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248

Frequency
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Frumkin
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

FTIR
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Fuel
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Fuel-Cell
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541

Fully
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59

Fumed
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121

Function
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90

Functional
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Furnace
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424

Furnaces
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Future
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

G

Ga-Diffused
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

GaAs
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Gadolinia-Doped
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466

Gage
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281

Gallate
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132

Gallium
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246

Galvanic
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
Solid-State Electrochemical Probing of Atmospheric and Galvanic Corrosion—**149** (7) B328

Galvanostatic
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363

Gamma-Ray
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213

GaN
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482

Garnet:Ce^{3+}
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Gas
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160

Gas-Diffusion
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182

Gas-Evolving
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71

Gas-Oscillator
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71

Gas-Phase
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112

Gas-Sensing
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169

Gaseous
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393

Gases
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227

Gate
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Gd_2O_3-Based
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12

Gel
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988

Gel-Type
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849

Gels
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292

Generated
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Generation
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Geometry
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413

Gettering
Intrinsic Gettering of Copper in Silicon Wafers—**149** (6) G343

Giant
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195

Glass
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Glasses
A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450

Glassy
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366

Global
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12

Glucose
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Glycine
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
The Role of Glycine in the Chemical Mechanical Planarization of Copper—**149** (6) G352

Glycol
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

Gold
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Grade-2
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440

Gradient
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146

Gradients
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648

Graft
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592

Grafted
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Grain
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19

Grain-Boundary
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35

Graph
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

Graphite
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326

Graphite-Coke
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804

Graphite-Hard
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804

Graphitic
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255

Green
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49

Groups
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Growing
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

Grown
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

Growth
Growth Mechanism of CBD-In$(OH)_xS_y$ thin Films—**149** (1) C59
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26
Neural Network Modeling of Growth Processes—**149** (2) G137
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

H

H_2
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Stable Pd/V_2O_5 Optical H_2 Sensor—**149** (3) H76

H_2O
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75

H_2O_2
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256

H_2S-O_2
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808

H_2SO_4
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Hafnium
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18

Hard-Gate
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149

Hardening
Interface Hardening with Deuterium Implantation—**149** (8) G446

Harmonic
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Hazard
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198

HCl
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

$HClO_4$
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

HCOOH
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75

Head
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375

Health
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644

Heat
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379

Heat-Treatment
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Heated
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5{\cdot}nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Hectorite-Based
Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667

Heptyl
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Heteroepitaxial
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603

Heterogeneous
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Heterojunction
The Inverted p-Diamond/n-CdTe Heterojunction Solar Cell—**149** (1) G55
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394

Heteropoly
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117

Heteropolyanion
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84

Heteropolyanions
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96

Heterostructures
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Thermal Oxidation of III-V Materials and Heterostructures—**149** (10) G581

Hexacyanoferrates
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195

Hexaferrite
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Hexafluorophosphate
Electrochemical Properties of Alkali Metals in 1-Butyl-3-Methylimidazolium Hexafluorophosphate—**149** (6) E185

Hexagonal
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960

HF
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331

HfI_4-Based
Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139

HfO_2
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139

Hg
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

High-Capacitance
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058

High-Density
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

High-Dielectric-Constant
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529

High-*k*
Electrical Characteristics of High-*k* Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69

High-Performance
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393

High-Resolution
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable Ti/TiO_2/Pt Electrode—**149** (7) B306
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490

High-Silica
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

High-Surface-Area
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272

High-Temperature
Electric Fields Produced by High-Temperature Metal Oxidation—**149** (1) J11
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261

High-Voltage
High-Voltage Cycling Behavior of Thin-Film $LiCoO_2$ Cathodes—**149** (11) A1442

Hole
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

Homoepitaxial
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179

Homogeneous
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

HOPG
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84

Hot
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97

Hot-Pressed
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173

Hybrid
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546

Hybrids
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804

Hydrated
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Hydrazine
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35

Hydride
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462
Electrochemical Behavior of Hydride Ion in a LiCl-KCl Eutectic Melt—**149** (5) E159
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273

Hydrodynamic
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Hydrofluosilicic
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362

Hydrogen
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748

A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^{7}Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
Monitoring of Hydrogen Absorption into Titanium Using Resistometry—**149** (9) B422
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

Hydrogen-Induced
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Hydrogenated
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Electrochemistry of Nitrogen-Incorporated Hydrogenated Amorphous Carbon Films—**149** (7) E233

Hydrogenation
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182

Hydrophilic
Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348

Hydrosilylation
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59

Hydrothermal
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349

Hydrothermally
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224

Hydroxide
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
Electrochemical Study of Zinc-Substituted Nickel Hydroxide—**149** (9) A1136
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Hyperthermal
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29

I

Ideal
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Ideally
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049

III-Nitride
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603

III-V
Thermal Oxidation of III-V Materials and Heterostructures—**149** (10) G581

Imaging
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84

Imide-Ethyl
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

Immersed
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Immersing
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167

Immersion
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456

Impact
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485

Impedance
Impedance Studies of the Thin Film $LiMn_2O_4$/Electrolyte Interface—**149** (1) A61
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307
Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615

Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Implant
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424

Implantation
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184
Interface Hardening with Deuterium Implantation—**149** (8) G446
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539

Implanted
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474
Activation of C Atoms Implanted into GaAs Annealed with Highly As-Doped a-Si:H Films—**149** (10) G593

Implications
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331

Important
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57

Impregnated
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292

Impregnation
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175

Improvement
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008

Improving
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8

Impurities
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167

Impurity
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139

In Situ
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
Understanding the Anomalous Capacity of $Li/Li[Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}]O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413

In_2O_3
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59

Inclusions
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286

Incorporated
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227

Incorporating
Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402

Incorporation
Surface Kinetics of Oxygen Incorporation into $SrTiO_3$—**149** (2) J19
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35

Increase
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868

Increasing
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280

Independence
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149

Indicator
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644

Indium
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485

Individual
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260

Induced
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367

Inductively
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

Inductors
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Industrial
Electrochemical Treatment of Industrial Wastewater Containing Phenols—**149** (5) D57

Inexpensive
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393

Influenced
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211

Influencing
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) A1157

Influence
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393

InGaP/GaAs
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213

Inhibited
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206

Inhibition
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379
Cathodic Inhibition Effects during NiFe and ZnNi Alloy Deposition—**149** (11) C567
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615

Initial
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98

Initiation
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440

Injection
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345

Injection-Metallorganic
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44

Inorganic
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212

Inorganic-Organic
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546

InP
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

Insertion
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

Insertion/Extraction
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40

Insights
Insights into the Electrodeposition of Bi_2Te_3—**149** (11) C546

Insulators
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49

Integrated
Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Integration
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45
Structural Stability of Metallorganic Chemical Vapor Deposited (Ba,Sr)RuO_3 Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Intensification
Intensification of Water Electrolysis in a Centrifugal Field—**149** (11) D172

Interaction
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
The Nature of the Interaction Between Polyaniline and 2,5-Dimercapto-1,3,4-thiadiazole in Electrochemical Redox Processes—**149** (9) A1171

Interactions
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163
Intermolecular Interactions in Lactone-Based Electrolytes—**149** (9) E340
Interactions Between Nanoporous Silica and Copper—**149** (9) F122
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

Intercalated
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286

Intercalation
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1
Novel High Rate Lithium Intercalation Cathode Materials—**149** (2) A99
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391

Intercalation-Deintercalation
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

Interconnect
Electromigration in Nanometer Al-Cu Interconnect Lines—**149** (2) G103
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797
Common n- and p- Contact for Serial Wiring of Quaternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Interconnections
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408

Interconnects
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

Interdiffusions
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455

Interest
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638

Interface
Impedance Studies of the Thin Film $LiMn_2O_4$/Electrolyte Interface—**149** (1) A61
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297
Poly (ethylene oxide)-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891
Detection of Metal Segregation at the oxide-Silicon Interface—**149** (7) G429
Interface Hardening with Deuterium Implantation—**149** (8) G446
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521

Interfaces
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293

Interfacial
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121

Intermediate
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808

La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823

Intermediate-Temperature
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Intermolecular
Intermolecular Interactions in Lactone-Based Electrolytes—**149** (9) E340

Interpretation
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40

Interstitial
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

Intio
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Intercalation
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195

Intrinsic
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Intrinsic Gettering of Copper in Silicon Wafers—**149** (6) G343
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146

Inversion
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505

Inverted
The Inverted p-Diamond/n-CdTe Heterojunction Solar Cell—**149** (1) G55

Investigated
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

Investigating
A Galvanic Corrosion Approach to Investigating Chromate Effects on Aluminum Alloy 2024-T3—**149** (5) B179
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301

Involatile
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2—**149** (2) A87

Involving
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324

$In_xGa_{1-x}N$
A Photoelectrochemical Study of $In_xGa_{1-x}N$ Films—**149** (5) E173

Ion
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622
Electrochemical Behavior of Hydride Ion in a LiCl-KCl Eutectic Melt—**149** (5) E159
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195
Sulfone-Based Electrolytes for Lithium Ion Batteries—**149** (7) A920
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Ion-Plated
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234

Ionic
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Ionic Mobilities in Amorphous Anodic Titania—**149** (3) B70
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

Ionization
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Ionomers
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Ions
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246

Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506

IrO_2
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187

Iron
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
Mechanisms of Metal Dusting Corrosion of Iron—**149** (7) B348
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
Oxide/Polypyrrole composite Films for Corrosion Protection of Iron—**149** (12) B560

Iron-Carbon-Boron
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370

Iron-Group
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615

Iron-Nickel
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492

Irradiation
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236

Irreversible
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Isomer
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374

Isopropyl
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306

Isotherm
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

J

Junction
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

K

K-Edge
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

Keggin-Type
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96

Kelvin
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403

KF-2HF
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Kinds
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381

Kinetic
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164

Kinetics
Kinetics of Double-Layer Charging/Discharging of Activated Carbon Electrodes—**149** (2) A93
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
Surface Kinetics of Oxygen Incorporation into $SrTiO_3$—**149** (2) J19
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510
Kinetics of Particle Codeposition of Nanocomposites—**149** (11) C610

KOH
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491

Kraft
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125

L

L-Edge
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

La
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823

La(Sr)CoO_3
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13

$La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125

$La_{0.6}Sr_{0.4}CoO_{3-\delta}$
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252

La0.6Sr0.4MnO3
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

$La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

$La_{1-x}A_xMnO_{3+\delta}$
Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531

$La_{1-x}Sr_xCo0_{3-\delta}$
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41

La_2O_3
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345

Lactone-Based
Intermolecular Interactions in Lactone-Based Electrolytes—**149** (9) E340

$LaGaO_3$
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823

Laminated
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439

Lamp-Based
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424

Lamp-Heated
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355

Langmuir
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

Langmuir-Blodgett
Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402

Lanthanum
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132

Large-Sized
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Laser
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

Laser-Induced
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Lateral
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Lauryl
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Laves
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537

Layer
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505
Comparison of Photoelectrochromic Devices with Different Layer Configurations—**149** (9) H159
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Layer/Silicon
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309

Layered
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157
Structure and Electrochemistry of Layered $Li[Cr_xLi_{(1/3-x/3)}Mn_{(2/3-2x/3)}]O_2$—**149** (11) A1454

Layered-Structure
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792

Layers
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Lead
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Lead-Acid
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934

Lead-Base
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Length
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Level
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409

Levels
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

Li
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

$Li(C_4F_9SO_2)(CF_3SO_2)N$
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185

$Li(CF_3SO_2)_2N$
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185

Li-Insertion
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152

Li-Ion
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
Studies on Capacity Fade of Spinel-Based Li-Ion Batteries—**149** (1) A54
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418
Study of $LiBF_4$ as an Electrolyte Salt for Li-Ion Battery—**149** (5) A586
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

Li-ion
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326

Li-Ion
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

Li-Ti-O
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224

Li/FeS_2
Nano-FeS_2 for Commercial Li/FeS_2 Primary Batteries—**149** (11) A1499

$Li/LiMn_3O_6$
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The $Li/LiMn_3O_6$ Case—**149** (2) A212

$Li/LiMnO_2$
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable $Li/LiMnO_2$ Cells—**149** (6) A792

Li/Li_xMnO_2
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967

$Li_{0.5}CoO_2$
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912

$Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$
Synthesis and Electrochemical Characteristics of $Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$ Cathode Materials—**149** (9) A1250

$Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103

$Li_{1+y}Mn_{2-y}O_4$
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842

$Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431

$Li_{2/3}[Co_xNi_{1/3-x/2}Mn_{2/3-x/2}]O_2$
T2 and 02 $Li_{2/3}[Co_xNi_{1/3-x/2}Mn_{2/3-x/2}]O_2$ Electrode Materials—**149** (8) A1083

Li_2CO_3-Na_2CO_3-K_2CO_3
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72

Li_2MnO_3
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509

$Li_4TI_5O_{12}$/Poly(fluorophenylthi
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302

$LiAl_yCo_{1-y}O_2$
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305

$LiBF_4$
Study of $LiBF_4$ as an Electrolyte Salt for Li-Ion Battery—**149** (5) A586

$LiCaAlF_6$
High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27

$LiCF_3SO_3$
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185

LiCl-KCl
Electrochemical Behavior of Hydride Ion in a LiCl-KCl Eutectic Melt—**149** (5) E159

LiCl-KCl-CaO
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155

$LiClO_4$
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855

$LiCo_{0.3}Ni_{0.7}O_2$
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688

$LiCo_2O_4$
Synthesis and Electrochemical Properties of $LiCo_2O_4$ Spinel Cathodes—**149** (2) A162

$LiCoO_2$
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405
High-Voltage Cycling Behavior of Thin-Film $LiCoO_2$ Cathodes—**149** (11) A1442
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

$LiCoO_2$/Graphite
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

$LiCo_xMn_{1-x}0_2$
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349

$LiCo_xMn_{2-x}O_4$
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Life
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337

$LiFeO_2$
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509

$LiFePO_4$
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886

$LiFePO_4$/C
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

Lifetime
Influence of Depth-Inhomogeniety of Lifetime in Silicon Solar Cells—**149** (9) G522

Light
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Light-Emitting
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Lightly
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189

Limit
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654

Limitations
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338

Limiting
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6

Limits
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318

$LiMn_{1-x}Cr_xO_2$
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792

$LiMn_2O_4$
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
Cycle Performance in Each State-of-Charge in $LiMn_2O_4$—**149** (12) A1514
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

$LiMn_2O_4$/Electrolyte
Impedance Studies of the Thin Film $LiMn_2O_4$/Electrolyte Interface—**149** (1) A61

$LiMnO_2$
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288

$LiMn_yFe_{1-y}PO_4$
Optimized $LiMn_yFe_{1-y}PO_4$ as the Cathode for Lithium Batteries—**149** (6) A743

Linear
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Lines
Electromigration in Nanometer Al-Cu Interconnect Lines—**149** (2) G103
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331

$LiNi_{0.5}Mn_{1.5}O_4$
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339

$LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246

$LiNiO_2$
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114

$LiPF_6$
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Lipid
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227

Liquid
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345

Liquid-Delivery
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Liquids
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348

$LiSrAlF_6$

High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27

Lithiated

Structural Transformations in Lithiated η´-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736

Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030

Lithium

Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1

ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19

Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26

Novel High Rate Lithium Intercalation Cathode Materials—**149** (2) A99

Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185

Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201

Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The $Li/LiMn_3O_6$ Case—**149** (2) A212

Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217

The Electrochemical Reduction of Co_3O_4 in a Lithium Cell—**149** (3) A234

The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251

The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262

Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297

Estimation of Diffusion Coefficient of Lithium in Carbon Using AC Impedance Technique—**149** (3) A307

A New Additive for Lithium Battery Electrolytes Based on an Alkyl Borate Compound—**149** (3) A355

In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385

A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391

Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401

High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414

Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493

Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546

Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570

A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574

An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622

Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667

Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675

All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688

$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Optimized $LiMn_yFe_{1-y}PO_4$ as the Cathode for Lithium Batteries—**149** (6) A743

Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804

Poly (ethylene oxide)-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891

Sulfone-Based Electrolytes for Lithium Ion Batteries—**149** (7) A920

Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960

Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988

Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001

Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121

Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218

Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255

Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267

The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286

Lithium Electrochemical Deintercalation from 02-$LiCo0_2$. Structure and Physical Properties—**149** (10) A1310

The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460

Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578

Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610

Lithium-Ion

Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319

Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361

Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466

Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499

TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635

Low-Temperature Characterization of Lithium-Ion Carbon anodes via Microperturbation Measurement—**149** (6) A754

Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020

Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237

Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358

Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598

Lithium/Oxygen
Characterization of the Lithium/Oxygen Organic Electrolyte Battery—**149** (9) A1190

Lithium/Sulfur
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321

Lithographic
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555

Liquids
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Li_xCoO_2
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533
Staging Phase Transitions in Li_xCoO_2—**149** (12) A1604

$Li_xMn_yFe_{1-y}PO_4$
X-Ray Absorption Study of $Li_xMn_yFe_{1-y}PO_4$ ($O<x<1, O<y<1$)—**149** (11) A1414

LiZnN
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262

$Li[Cr_xLi_{(1/3-x/3)}Mn_{(2/3-2x/3)}]O_2$
Structure and Electrochemistry of Layered $Li[Cr_xLi_{(1/3-x/3)}Mn_{(2/3-2x/3)}]O_2$—**149** (11) A1454

$Li[Ni_xCo_{1-2x}Mn_x]O_2$
Structure and Electrochemistry of $Li[Ni_xCo_{1-2x}Mn_x]O_2$ ($O< x < 1/2$)—**149** (10) A1332

$Li[Ni_xLi_{1/3-2x/3}Mn_{2/3-x/3}]O_2$
Synthesis, Structure, and Electrochemical Behavior of $Li[Ni_xLi_{1/3-2x/3}Mn_{2/3-x/3}]O_2$—**149** (6) A778

$LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462

Loading
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148

Local
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246

Localized
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163
Localized Corrosion Growth Kinetics in AA2024 Alloys—**149** (11) B510

Loss
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81

Low-Damage
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420

Low-Dielectric
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92

Low-Dimensional
The Role of Low-Dimensional Systems in Electrochemical Phase Formation and Dissolution Processes—**149** (12) K47

Low-Doped
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511

Low-k
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9

Low-Pressure
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301

Low-Temperature
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Low-Temperature Characterization of Lithium-Ion Carbon anodes via Microperturbation Measurement—**149** (6) A754

Low-Voltage
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

LSGM-LSM
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Luminescent
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65
Luminescent Property of Eu^{3+} in a New Compound, $Sr_{0.99}La_{1.01})Zn_{0.99}O_{3.495}$—**149** (3) H68
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165

M

Macrodecoration
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153

Macromolecules
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Macropore
Random and Ordered Macropore Formation in p-Type Silicon—**149** (1) G70
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338

Macropores
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511

Magic
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103

Magic-Angle
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^{7}Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030

Magnesium
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103

Magnetic
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^{7}Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469
Magnetic Properties of the Electrochemically Deposited Ni/Cu Superlattices—**149** (11) C607
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^{7}Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

Magnetoresistance
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195

Magnetotransport
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469

Manganese
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Electrodeposition and Characterization of Manganese Coatings—**149** (4) C209
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
A ^{7}Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001
Capacity Fading of Graphite Electrodes Due to the Deposition of Manganese Ions on Them in Li-ion Batteries—**149** (10) A1326
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419

Manganese-Chromium
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176

Mapping
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Martensitic
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370

Mass
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Mass-Transport
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448

Material
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509
Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Materials
Novel High Rate Lithium Intercalation Cathode Materials—**149** (2) A99
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020
T2 and 02 $Li_{2/3}[Co_xNi_{1/3-x/2}Mn_{2/3-x/2}]O_2$ Electrode Materials—**149** (8) A1083
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Synthesis and Electrochemical Characteristics of $Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$ Cathode Materials—**149** (9) A1250
Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555
Thermal Oxidation of III-V Materials and Heterostructures—**149** (10) G581
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405

Mathematical
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286

Matrix
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

Maximize
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

Mechanical
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305
The Role of Glycine in the Chemical Mechanical Planarization of Copper—**149** (6) G352
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Mechanically
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1

Mechanics
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31

Mechanism
Growth Mechanism of CBD-$In(OH)_xS_y$ thin Films—**149** (1) C59
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331

A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane fuel Cells—**149** (6) A748
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
On the Conductivity Mechanism of Nanocrystalline Ceria—**149** (10) J73
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Mechanisms
Mechanisms of Metal Dusting Corrosion of Iron—**149** (7) B348
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Media
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534

Mediation
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173

Mediators
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Medium
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Medium-Doped
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338

Medium-Temperature
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13

Melt
Electrochemical Behavior of Hydride Ion in a LiCl-KCl Eutectic Melt—**149** (5) E159

Melting
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Membrane
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160

Membrane-Electrode
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448

Membranes
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132

Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Memory
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Mercury
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
A Contribution to the Study of the Electroreduction of 2,4-Diamino-1,3,5-triazine on Mercury Electrodes—**149** (8) E306

Merwe
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109

Meso/Macroporous
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855

Mesoporous
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116

Metal
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Electric Fields Produced by High-Temperature Metal Oxidation—**149** (1) J11
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Mechanisms of Metal Dusting Corrosion of Iron—**149** (7) B348
Reliability Characteristics of W/WN/TaO_xN_y/SiO_2/Si Metal Oxide Semiconductor Capacitors—**149** (7) G403
Detection of Metal Segregation at the oxide-Silicon Interface—**149** (7) G429
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Metal-Based
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212

Metal-Insulator-Metal
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56

Metal-Oxide
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288

Metal-Oxide-Semiconductor
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362

Metal-Phthalocyanine
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182

Metal-Semiconductor
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236

Metal-Substituted
A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^7Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

Metallic
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905
A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Metallization
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Metallorganic
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529

Metallorganic
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Metals
Electrochemical Properties of Alkali Metals in 1-Butyl-3-Methylimidazolium Hexafluorophosphate—**149** (6) E185

Methane
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143

Methane-Air
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133

Mechanical
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Methanol
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448

Methodology
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143

Methyl
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

Methylsilsesquioxane
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

MFI
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

$Mg_{2-x}Mm_xNi$
The Corrosion Behaviors of the Ternary $Mg_{2-x}Mm_xNi$ Alloys—**149** (5) A543

MgNi-Carbon
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616

MgO
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482

Micropattern
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375

Micro-Raman
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491

Microbalance
Transient Quarts Crystal Microbalance Behaviors Compared—**149** (1) H33
The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179

Microbatteries
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19

Microbiologically
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211

Microcell
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272

Microdefects
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

Microelectrode
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370

Microelectromechanical
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78

Microelectronic
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143

Microemulsions
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Microgel
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Microperturbation
Low-Temperature Characterization of Lithium-Ion Carbon anodes via Microperturbation Measurement—**149** (6) A754

Microporous
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49

Microroughness
Microroughness and Composition of Cyanide Treated $CuInS_2$—**149** (1) G77

Microscopy
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

Microsensor
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Microspectroscopy
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413

Microstructural
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248

Microstructure
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116

Microstructures
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321

Microsystems
Development and Characterization of Co-Ni Alloys for Microsystems Applications—**149** (4) C201

Microwave
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297

Milled
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1

Milling
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152

Minimum
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511

Minor
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139

Mixed
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_2O_x$ Thin Films—**149** (6) H113
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Mixed-Conducting
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242

Mixture
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133

Mixtures
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179

$MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407

$MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983

$Mn_3O_{4+\delta}$
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Mo-Ti
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

MO/Li
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627

Mobile
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Mobilities
Ionic Mobilities in Amorphous Anodic Titania—**149** (3) B70

Mobility
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

MOCVD
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585

MOCVD-Fe_2O_3
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169

Model
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305
A Mathematical Model for Initiation of Microbiologically Influenced Corrosion by Differential Aeration—**149** (6) B211
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107

Modeling
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
Neural Network Modeling of Growth Processes—**149** (2) G137
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146

Modelling
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497

Models
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Modification
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008

Modifications
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633

Modified
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
Novel Modified Graphite as Anode Material for Lithium Ion Batteries—**149** (9) A1218
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592

Modulated
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Electrodeposition of FeCoNiCu/Cu Compositionally Modulated Multilayers—**149** (6) C349

Module
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324
Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Modules
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45

Moisture
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123

Molecular
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Molecules
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487

Molten
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Electrode Behavior of Hydride Ion in Molten Alkali Chlorides—**149** (8) E273
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Molybdenum
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146

Monitoring
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281
Monitoring of Hydrogen Absorption into Titanium Using Resistometry—**149** (9) B422

Monocrystalline
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153

Monolayer
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Monolithic
Common n- and p- Contact for Serial Wiring of Quarternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Monoxide
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383

Monte
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406

Morphological
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16

Morphology
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648

Morphology/Behavior
Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255

Mössbauer
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736

Moving
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324

MPCVD
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1

MTW
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

Multilayer
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}$(Co_2Z)-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Multicomponent
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710

Multilayer
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455

Multilayers
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195
Co-Ni-Cu/Cu Multilayers Electrodeposited Using a Channel Flow Cell—**149** (4) C218
Electrodeposition of FeCoNiCu/Cu Compositionally Modulated Multilayers—**149** (6) C349

Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Multilevel
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324

Multiple
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384

Multiwall
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39

N

N-Type
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

N_2
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1

N_2O
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73

Na^+
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123

Na-beta-Alumina
Determination of the p-Electron Conduction Parameter of Na-beta-Alumina by Potentiometric Measurements—**149** (9) E311

NaCl
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187

Nafion
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

Nano-FeS_2
Nano-FeS_2 for Commercial Li/FeS_2 Primary Batteries—**149** (11) A1499

Nanocomposite
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The Li/$LiMn_3O_6$ Case—**149** (2) A212
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610

Nanocomposites
Kinetics of Particle Codeposition of Nanocomposites—**149** (11) C610

Nanocrystal
Cathodoluminescence and Photoluminescence of Nanocrystal Phosphors—**149** (3) H72

Nanocrystalline
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
On the Conductivity Mechanism of Nanocrystalline Ceria—**149** (10) J73
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419

Nanogeometry
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1

Nanohybrid
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Nanohybrids
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953

Nanometer
Electromigration in Nanometer Al-Cu Interconnect Lines—**149** (2) G103

Nanoparticle
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299

Nanoparticles
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

Nanoparticulate
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481

Nanopore
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35

Nanopores
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulfuric Acid—**149** (7) D97

Nanoporous
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Interactions Between Nanoporous Silica and Copper—**149** (9) F122

Nanosized
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405

Nanostructured
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001

Nanotopography
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257

Nanotube
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616

Nanotubes
Electrochemical Li Insertion in B-Doped Multiwall Carbon Nanotubes—**149** (1) A39

NaOH
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167

Narrow
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485

Native
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1

Natural
Lithium Intercalation into Mechanically Milled Natural Graphite. Electrochemical and Kinetic Characterization—**149** (1) A1
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Characterization of Carbon-Coated Natural Graphite as a Lithium-Ion Battery Anode Material—**149** (4) A499
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146

Nb
Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457

Need
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195

Needle-Like
Electrodeposition of Tin Needle-Like Structures—**149** (3) C150

Negative
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020

Network
Neural Network Modeling of Growth Processes—**149** (2) G137
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030

Networks
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

Neural
Neural Network Modeling of Growth Processes—**149** (2) G137

Neutral
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419

Newton-Krylov-Multigrid
Newton-Krylov-Multigrid Algorithms for Battery Simulation—**149** (10) A1342

Next-Generation
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529

NH_4F
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245

NH_4HF_2
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245

Ni
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Ni(Pt)-Silicides
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331

(Ni)-Catalyzed
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168

Ni-and
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331

Ni-Based
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Ni-Co
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27

Ni/Ceria
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927

Ni/Cu
Magnetic Properties of the Electrochemically Deposited Ni/Cu Superlattices—**149** (11) C607

Ni/MH
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

Ni/W
Electroplating of Ni/W Alloys I. Ammoniacal Citrate Baths—**149** (2) C100

Ni/Y_2O_3-ZrO_2
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175

Ni_{81}
Giant Magnetoresistance of Electrodeposited $Ni_{81}Cu_{19}$/Cu Multilayers—**149** (4) C195

Nickel
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383
Electrochemical Study of Zinc-Substituted Nickel Hydroxide—**149** (9) A1136
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637
Hydrogen-Induced Lateral Growth of Nickel Coating on $Ba_3Co_2Fe_{24}O_{41}(Co_2Z)$-Based Hexaferrite during the Electroplating of Multilayer Chip Inductors—**149** (12) J89

Nickel-Copper
Electrodeposition and Characterization of Nickel-Copper Alloy Films as Electrode Material in Alkaline Media—**149** (10) B465

Nickel-Loaded
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855

Nickel-Metal
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462

Nickelate
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401

NiFe
Cathodic Inhibition Effects during NiFe and ZnNi Alloy Deposition—**149** (11) C567

NiO
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873

NiO_x
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346

NIPAM
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

$NiTe_2$
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147

Nitride
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51

Nitride
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179

Nitrate
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131

Nitric
Nitric Acid Modification of Activated Carbon Electrodes for Improvement of Electrochemical Capacitance—**149** (8) A1008
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441

Nitride
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178

Nitrite
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357

Nitrites
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55

Nitroanisole
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374

Nitrogen
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146

Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Nitrogen-Incorporated
Electrochemistry of Nitrogen-Incorporated Hydrogenated Amorphous Carbon Films—**149** (7) E233

Nitrous
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532

NMR
A ^{7}Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^{7}Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

NN
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

Noise
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69

Nonactive
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118

Nonanomalous
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492

Nonflammable
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079

Non-Thickness-Limited
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

Nonaqueous
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456

Noncyanide
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168

Nondestructive
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

Nonflammable
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622

Nonformaldehyde
The Acceleration of Nonformaldehyde Electroless Copper Plating—**149** (12) C631

Nonionic
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477

Nonisothermal
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90

Nonlinear
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40

Nonradiative
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Nonstoichiometry
Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531

Nuclear
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^{7}Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^{7}Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

Nucleation
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a Cu-NH_3 Bath—**149** (8) C390

O

O_2
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Observed
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Ohmic
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367

Oligomer
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472

On-Chip
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408

On-Line
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Open-Circuit
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493

Operating
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879

Optical
Stable Pd/V_2O_5 Optical H_2 Sensor—**149** (3) H76
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by Zn_2SiO_4:Mn^{2+}—**149** (4) G251
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Optics
Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85

Optimal
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413

Optimization
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85
Optimization of Insertion Compounds Such as $LiMn_2O_4$ for Li-Ion Batteries—**149** (12) K31

Optimized
Optimized $LiMn_yFe_{1-y}PO_4$ as the Cathode for Lithium Batteries—**149** (6) A743

Optimizing
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Orbital
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Ordered
Random and Ordered Macropore Formation in p-Type Silicon—**149** (1) G70

Organic
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
Characterization of the Lithium/Oxygen Organic Electrolyte Battery—**149** (9) A1190
Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187

Organic/Inorganic
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389

Organomagnesium
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115

Organometallic
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526

Organosiloxane
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Organosulfur/Conducting
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939

Orientation
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Oriented
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114

Origin
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Origins
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398

Orthodontic
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Orthorhombic
The Effect of a Metal-Oxide Coating on the Cycling Behavior at 55°C in Orthorhombic $LiMnO_2$ Cathode Materials—**149** (3) A288

Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349

Oscillations
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423

Over-Potentially
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

Overlayer
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266

Overvoltage
Origin of the Anodic Overvoltage Observed during Fluorine Evolution in KF-2HF—**149** (12) E485

Oxidation
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Electric Fields Produced by High-Temperature Metal Oxidation—**149** (1) J11
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Thermal Oxidation of III-V Materials and Heterostructures—**149** (10) G581
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-Nanometer Surfaces—**149** (12) E479
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Oxidative
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143

Oxide
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394
Reliability Characteristics of $W/WN/TaO_xN_y/SiO_2/Si$ Metal Oxide Semiconductor Capacitors—**149** (7) G403
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482

Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Oxide-Based
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176

Oxide-Carbon
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26

Oxide-Ion
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39

Oxide/Polypyrrole
Oxide/Polypyrrole composite Films for Corrosion Protection of Iron—**149** (12) B560

Oxide/Polysilicon
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567

Oxide/SiO_2
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1

Oxides
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Nanocrystalline Manganese Oxides for Electrochemical Capacitors with Neutral Electrolytes—**149** (11) A1419
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Oxidized
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195

Oxofluorotungstates
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117

Oxygen
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
Surface Kinetics of Oxygen Incorporation into $SrTiO_3$—**149** (2) J19
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525
Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
The Role of Oxygen on the Stability of Crevice Corrosion—**149** (6) B198
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Oxygen-Incorporated
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Oxygen-Titanium
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Oxyhalides
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371

Oxyhydroxysulfide
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1

Oxynitride
Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532

Oxygen
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510

Ozone
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29

P

P-CdTe
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311

P-Type
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

Palladium
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

PAN-Based
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414

Parameter
Determination of the p-Electron Conduction Parameter of Na-beta-Alumina by Potentiometric Measurements—**149** (9) E311

Parametric
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324

Parasitic
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394

Partial
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237

Partially
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Particle
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
Kinetics of Particle Codeposition of Nanocomposites—**149** (11) C610

Particles
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272
Adhesion of Alumina Particles to Thin Films—**149** (4) G239
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Formation of Metal Oxide Particles by Anode-Discharge Electrolysis of Molten LiCl-KCl-CaO System—**149** (11) D155

Partition
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89

Passivation
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Passive
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543

Passivity
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333

Pattern
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379

Pb-Free
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Pb-Modified
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87

PbO_2
Electrosynthesis and Physicochemical Properties of PbO_2 Films—**149** (9) C445

Pd-Loaded
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503

Pd-Rich
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Pd/V_2O_5
Stable Pd/V_2O_5 Optical H_2 Sensor—**149** (3) H76

Pechini
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792

PEM
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

PEMs
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

PEO-LiN($SO_2CF_2CF_3$)$_2$
PEO-LiN($SO_2CF_2CF_3$)$_2$ Polymer Electrolytes III. Test in Batteries—**149** (10) A1282

Perfluorosulfonic
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Performance
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146
Effect of Electrolytes on Performance of Electrochemical Capacitors Based on Poly[3-(3,4-difluorophenyl)thiophene]—**149** (9) A1201
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
Cycle Performance in Each State-of-Charge in $LiMn_2O_4$—**149** (12) A1514
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Performances
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Perfused
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Periodic
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

Permanganate
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001

Permeability
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125

Permeation
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
Oxygen Permeation Through Dense $Bi_2V_{0.9}Cu_{0.1}O_{5.35}$ Ceramic Membranes—**149** (12) J93

Perovskite-Related
Oxygen Permeability and Ionic Conductivity of Perovskite-Related $La_{0.3}Sr_{0.7}Fe(Ga)O_{3-\delta}$—**149** (4) E125

Perturbed
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45

Petroleum
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201

Phase
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533
Staging Phase Transitions in Li_xCoO_2—**149** (12) A1604
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623
The Role of Low-Dimensional Systems in Electrochemical Phase Formation and Dissolution Processes—**149** (12) K47

Phase-Shift
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

Phosphate
Nonflammable Electrolytes for Li-Ion Batteries Based on Fluorinated Phosphate—**149** (8) A1079

Phenol
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118

Phenols
Electrochemical Treatment of Industrial Wastewater Containing Phenols—**149** (5) D57

Phenomena
Electrochemical Noise Measurements of Coalescence and Gas-Oscillator Phenomena on Gas-Evolving Electrodes—**149** (3) E71
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718

Phenomenon
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft- *vs.* Hard-Gate Capacitors—**149** (10) F149

Phosphate
Formation of Anodic Films on Magnesium Alloys in an Alkaline Phosphate Electrolyte—**149** (1) B4
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^{7}Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Phosphates
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Aikyl Phosphates and Phosphazenes—**149** (5) A622
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Phosphazenes
An Attempt to Formulate Nonflammable Lithium Ion Electrolytes with Alkyl Phosphates and Phosphazenes—**149** (5) A622

Phosphor
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Phosphorescent
Electrogenerated Chemiluminescence from Phosphorescent Molecules Used in Organic Light-Emitting Diodes—**149** (5) E137

Phosphoric
Corrosion-Related Interfacial Defects Formed by Dissolution of Aluminum in Aqueous Phosphoric Acid—**149** (4) B108

Phosphorous
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175

Phosphors
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44
Cathodoluminescence and Photoluminescence of Nanocrystal Phosphors—**149** (3) H72
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85
Combinatorial Synthesis of Tb-Activated Phosphors in the CaO-Gd_2O_3-Al_2O_3 System—**149** (12) H183

Photocapacitance
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

Photocatalysts
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317

Photochemical
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464

Photocurrent-Voltage
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Photoelectrochemical
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I-/I_2—**149** (2) A87
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
A Photoelectrochemical Study of $In_xGa_{1-x}N$ Films—**149** (5) E173
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413

Photoelectrochromic
Comparison of Photoelectrochromic Devices with Different Layer Configurations—**149** (9) H159

Photoelectron
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Photoluminescence
Stable Blue Photoluminescence from Porous Silicon—**149** (1) C50
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49
Cathodoluminescence and Photoluminescence of Nanocrystal Phosphors—**149** (3) H72

Photoresist
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Photoresists
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78

Photosensitive
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555

Photovoltaically
Photovoltaically Self-Charging Battery—**149** (9) A1208

Phthalocyanine
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89

Physical
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
Lithium Electrochemical Deintercalation from 02-$LiCoO_2$. Structure and Physical Properties—**149** (10) A1310

Physicochemical
Electrosynthesis and Physicochemical Properties of PbO_2 Films—**149** (9) C445
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Physics
Physics of Copper in Silicon—**149** (1) G21

Pi-Pi
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472

Pit
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286

Pitting
A Study of Corrosion and Pitting Initiation of AA2024-T3 Using Atomic Force Microscopy—**149** (6) B239

Placement
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166

Planarization
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
The Role of Glycine in the Chemical Mechanical Planarization of Copper—**149** (6) G352
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620

Plane
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699

Planarization
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638

Plasma
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318
Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592

Plasma-Enhanced
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103

Plasmas
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

Plasticizers
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2—**149** (2) A87

Plate
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934

Plates
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905

Plating
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Calculation of the Optimal Geometry of Electrochemical Cells Application to the Plating on Curved Electrodes—**149** (8) C413
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
The Acceleration of Nonformaldehyde Electroless Copper Plating—**149** (12) C631

Platinum
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579

Platinum/Polybenzimidazole
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143

PN
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

PNb_9O_{25}
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391

Point
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Poison
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140

Poisoning
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765

Polarized
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4

Polarization
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Concentration Polarization of a Polymer Electrolyte—**149** (8) A1015
Effect of Top Electrode Deposition Condition on Polarization Fatigue of RuO_2/Pb(Zr,Ti)O_3/RuO_2 Thin Film Capacitors—**149** (10) F152

Polarized
Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531

Polish
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Polished
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257

Polishing
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305
Modeling the Effect of Bumpy Abrasive Particles on Chemical Mechanical Polishing—**149** (7) G370
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Polishing-Related
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131

Poly
Poly (ethylene oxide)-LiN($SO_2CF_2CF_3$)$_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441

Poly(3,4-Alkylenedioxythiophen
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973

Poly(acrylonitrile
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662

Poly(carboxyterthiophene
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265

Poly(ethylene
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The Li/$LiMn_3O_6$ Case—**149** (2) A212
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849

Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Poly(methyl
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988

Poly(tetrafluoroethylene
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10

Poly(vinylferrocene
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137

Poly(vinylidene
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Poly(Vinylidene
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230

Poly-Ni/KOH
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

Poly-Si
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567

Poly3-(4-fluorophenylthiophene)
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376

Polyacrylonitrile
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148

Polyaniline
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546
The Nature of the Interaction Between Polyaniline and 2,5-Dimercapto-1,3,4-thiadiazole in Electrochemical Redox Processes—**149** (9) A1171
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393

Polybenzimidazole
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119

Polycrystalline
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Polyethylene
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

Polymer
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Polymer Electrolyte Photoelectrochemical Cells with Involatile Plasticizers. I. The n-Si/I^-/I_2—**149** (2) A87
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The $Li/LiMn_3O_6$ Case—**149** (2) A212
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107
A New Concept for the Formation of Homogeneous, Poly(ethylene oxide) based, Gel-Type Polymer Electrolyte—**149** (7) A849
Poly (ethylene oxide)-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes. II. Characterization of the Interface with Lithium—**149** (7) A891
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
Concentration Polarization of a Polymer Electrolyte—**149** (8) A1015
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
PEO-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes III. Test in Batteries—**149** (10) A1282
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Polymer-Coated
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265

Polymer-electrolyte
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Polymerization
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592

Polymers
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137

Polymorphic
Modified Nickel Hydroxide Electrodes Effect of Cobalt Metal on the Different Polymorphic Modifications—**149** (6) A761

Polyol
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27

Polyoxyethylene
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Polypyrrole
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058

Polypyrrole-Anchored
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Polypyrrole-Coated
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215

Polypyrrole/k-Carrageenan
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394

Polypyrrole/Mixed
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525

Polysilicon
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6
Effect of Boron and BF_2^+ Implant on Polysilicon Resistors—**149** (4) G271
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477

Polythioethers
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Poly[3-(3,4-difluorophenyl)thi
Effect of Electrolytes on Performance of Electrochemical Capacitors Based on Poly[3-(3,4-difluorophenyl)thiophene]—**149** (9) A1201

Pore
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103

Pore-Filling
A Pore-Filling Electrolyte Membrane-Electrode Integrated System for a Direct Methanol Fuel Cell Application—**149** (11) A1448

Pore-Related
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103

Porogens
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Porosity
Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153

Porous
Stable Blue Photoluminescence from Porous Silicon—**149** (1) C50
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
A Model for the Porous Direct Methanol Fuel Cells Anode—**149** (9) A1107
Origins of Cracking in Highly Porous Anodically Grown Films on InP—**149** (9) B398
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

Porphyrin
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89

Positive
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037

Post
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336

Postdeposition
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63

Potassium
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Potential
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
On the Origin of the Extra Electrochemical Capacity Displayed by MO/Li Cells at Low Potential—**149** (5) A627
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
The Dealloying Critical Potential—**149** (8) B370
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423

Potential-Dependent
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293

Potential-pH
Potential-pH Diagrams of Interest to Chemical Mechanical Planarization of Copper—**149** (12) G638

Potentials
Anodic Dissolution and Electroluminescence of p-Si at High Potentials in Fluoride Media—**149** (5) C250

Potentiodynamically
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393

Potentiometric
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
Determination of the p-Electron Conduction Parameter of Na-beta-Alumina by Potentiometric Measurements—**149** (9) E311

Powder
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Irreversible and Discharge Capacities Depending on Dissolved Boron Concentration of Coke Powder—**149** (7) A834
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

Powders
Anomalous Electroless Polyol Deposition of FeNi Powders and Films—**149** (1) C68
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Polyol Electroless and Electrodeposition of Nanostructured Ni-Co Films and Powders—**149** (3) D27

Power
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358

PPy
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

Pr^{3+}-Doped
High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27

Preamplifier
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Precise
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978

Precombustion
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532

Precursor
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23

Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35

Precursors
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44

Predicted
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Prenitridation
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63

Preparation
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
Preparation and Characterization of Cu Doped P-CdTe Films Grown by Cathodic Electrodeposition—**149** (6) C311
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603

Preparing
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886

Presence
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
The Influence of Carbon Dioxide on the Atmospheric Corrosion of Some Magnesium Alloys in the Presence of NaCl—**149** (4) B103
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261

Pressure
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765

Pressures
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73

Pretreatment
The Analysis of Oxygen Plasma Pretreatment for Improving Anodic Bonding—**149** (1) G8
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237

Primary
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498
Nano-FeS_2 for Commercial Li/FeS_2 Primary Batteries—**149** (11) A1499

Prior
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

Probe
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Langmuir Probe Measurements in Inductively Coupled CF_4-Ar Plasmas—**149** (10) C487

Probed
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736

Probing
Solid-State Electrochemical Probing of Atmospheric and Galvanic Corrosion—**149** (7) B328

Procedures
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905

Process
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Processes
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95

Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
Neural Network Modeling of Growth Processes—**149** (2) G137
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
The Nature of the Interaction Between Polyaniline and 2,5-Dimercapto-1,3,4-thiadiazole in Electrochemical Redox Processes—**149** (9) A1171
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379
A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450
Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651
The Role of Low-Dimensional Systems in Electrochemical Phase Formation and Dissolution Processes—**149** (12) K47

Processing
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555

Production
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Products
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45

Promotion
Electrochemical Promotion of Oxidative Coupling of Methane on Platinum/Polybenzimidazole Catalyst—**149** (10) D143

Properties
The Effects of Nitrogen and Plasma Power on Electrochemical Properties of Boron-Doped Diamond Electrodes Grown by MPCVD—**149** (1) E1
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Synthesis and Electrochemical Properties of $LiCo_2O_4$ Spinel Cathodes—**149** (2) A162
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of SrO.Al_2O_3:Eu^{2+} Phosphor—**149** (3) H65
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by Zn_2SiO_4:Mn^{2+}—**149** (4) G251
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Electrochemical Properties of Alkali Metals in 1-Butyl-3-Methylimidazolium Hexafluorophosphate—**149** (6) E185
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829
Martensitic Iron-Carbon-Boron Alloy Electrodeposit with Improved Mechanical Properties—**149** (7) C370
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439
Electrosynthesis and Physicochemical Properties of PbO_2 Films—**149** (9) C445
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543
Lithium Electrochemical Deintercalation from 02-$LiCo0_2$. Structure and Physical Properties—**149** (10) A1310
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469
Electrochemical Preparation and Properties of Films of Polypyrrole/k-Carrageenan Composites Dependence on k-Carrageenan Conformation—**149** (10) E394
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489
Magnetic Properties of the Electrochemically Deposited Ni/Cu Superlattices—**149** (11) C607
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509
Electrochemical Hydrogen Discharge Properties of MgNi-Carbon Nanotube Composites—**149** (12) A1616
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642
Chemically Bonded Porogens in Methylsilsesquioxane. II. Electrical, Optical, and Mechanical Properties—**149** (12) F171

Property
Luminescent Property of Eu^{3+} in a New Compound, $(Sr_{0.99}La_{1.01})Zn_{0.99}O_{3.495}$—**149** (3) H68

Propylene
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Effects of Some Organic Additives on Lithium Deposition in Propylene Carbonate—**149** (12) A1578

Protect
New Materials and Procedures to Protect Metallic PEM Fuel Cell Bipolar Plates—**149** (7) A905

Protection
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
Oxide/Polypyrrole composite Films for Corrosion Protection of Iron—**149** (12) B560

Protic
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409

Proton
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Effect of Ammonia as Potential Fuel Impurity on Proton Exchange Membrane Fuel Cell Performance—**149** (3) A293
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Amphiphilic Organic/Inorganic Nanohybrid Macromolecules for Intermediate-Temperature Proton Conducting Electrolyte Membranes—**149** (10) A1389
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423

Proton-Conducting
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104

Proton-Exchange
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868

Proton-Free
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51

Protonation
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939

Prussian
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Pt
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of $La(Sr)CoO_3$ Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Pt-Dispersed
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

Pt-Mo
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272

Pt-Ru
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Pt/C
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615

Pt/C/Nafion
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173

PtRu
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423

Pulp
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15

Pulping
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125

Pulse
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025

Pulse-Reverse
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492

Pulsed
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76

Pulsed-Force-Mode
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Pure
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79

Purely
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960

Pyrex
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497

Pyrite
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Pyrolysis
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78

Q

Qualitative
Qualitative Analysis on the Frumkin Adsorption Isotherm of the Over-Potentially Deposited Hydrogen at the Poly-Ni/KOH Aqueous Electrolyte Interface Using Phase-Shift Method—**149** (9) E325

Quantitative
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511

Quaternary
Common n- and p- Contact for Serial Wiring of Quaternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Quarts
Transient Quarts Crystal Microbalance Behaviors Compared—**149** (1) H33

Quartz
The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Fabrication and Characterization of Diamond Quartz Crystal Microbalance Electrode—**149** (11) H179

Quaternization
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10

R

Radical
Pressure Dependence of the Radical Densities in Fluorocarbon Discharges—**149** (4) G218
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Radicals
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12

Raman
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413

Random
Random and Ordered Macropore Formation in p-Type Silicon—**149** (1) G70

Range
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Rapid
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633

Rate
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12
Novel High Rate Lithium Intercalation Cathode Materials—**149** (2) A99
Influence of Anode Flow Rate and Cathode Oxygen Pressure on CO Poisoning of Proton Exchange Membrane Fuel Cells—**149** (6) A765
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Ratio
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180

Ration
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35

Rationalization
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212

Ratios
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Reaction
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
The CO Poisoning Mechanism of the Hydrogen Oxidation Reaction in Proton Exchange Membrane Fuel Cells—**149** (6) A748
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Reactions
Effect of Interfacial Reactions on Electrical Properties of Ni Contacts on Lightly Doped n-Type 4H-SiC—**149** (3) G189
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Reactive
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367

Reactivity
The Electrochemical Quartz Crystal Microbalance as a Means for Studying the Reactivity of Cu_2O toward Lithium—**149** (3) A251
Rationalization of the Low Potential Reactivity of 3d Metal-Based Inorganic Compounds toward Li—**149** (9) A1212
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Reactor
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Real-Time
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100

Rechargeable
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
Electrochemical Behavior of Al Current Collector of Rechargeable Lithium Batteries in Propylene Carbonate with $LiCF_3SO_3$, $Li(CF_3SO_2)_2N$, or $Li(C_4F_9SO_2)(CF_3SO_2)N$—**149** (2) A185
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The $Li/LiMn_3O_6$ Case—**149** (2) A212
Characterization of the Bismuth-Modified Manganese Dioxide Cathodes in Rechargeable Alkaline Cells—**149** (4) A483
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable $Li/LiMnO_2$ Cells—**149** (6) A792
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988
Hydrated Iron Phosphates $FePO_4.nH_2O$ and $Fe_4(P_2O_7)_3.nH_2O$ as 3 V Positive Electrodes in Rechargeable Lithium Batteries—**149** (8) A1037
Attempts to Improve the Behavior of Li Electrodes in Rechargeable Lithium Batteries—**149** (10) A1267
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584
Block Copolymer-Templated Nanocomposite Electrodes for Rechargeable Lithium Batteries—**149** (12) A1610

Recombination
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Recording
Micropattern Formation for Magnetic Recording Head Using Electroless CoFeB Deposition—**149** (8) C375

Recovering
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81

Recycle
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63

Recycling
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125

Red
Optimization of Gd_2O_3-Based Red Phosphors Using Combinatorial Chemistry Method—**149** (1) H12
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Redox
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
Studies of the Feasibility of a Ce^{4+}/Ce^{3+}-V^{2+}/V^{3+} Redox Cell—**149** (4) A426
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
The Nature of the Interaction Between Polyaniline and 2,5-Dimercapto-1,3,4-thiadiazole in Electrochemical Redox Processes—**149** (9) A1171
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Reduced
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195

Reduced-Temperature
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927

Reducing
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1
Nanostructured Lithium Manganese Oxide Cathodes Obtained by Reducing Lithium Permanganate with Methanol—**149** (8) A1001
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

Reduction
Cr(VI) and Ce(III) Inhibition of Oxygen Reduction on Copper—**149** (2) B47
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64
The Electrochemical Reduction of Co_3O_4 in a Lithium Cell—**149** (3) A234
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Electrochemical Reduction of Dihalo-2,2′-bithiophenes at Carbon Cathodes in Dimethylformamide—**149** (6) E222
Electrocatalytic Reduction of Molecular Oxygen Using a Poly(carboxyterthiophene) Appended by 1,5-diaminonaphthalene Copper Complex—**149** (7) E265
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Inhibition of Corrosion-Related Reduction Processes via Chromium Monolayer Formation—**149** (9) B379
Analysis of Oxygen Reduction on Pt Microelectrode with Polymer Electrolytes of Various Exchange Capacities—**149** (10) A1370
Free Radical Formation and Characterization of Nitroanisole Isomer Reduction in Different Media—**149** (10) E374
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Reference
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166

Refined
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301

Reflection
Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89

Refractory
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Regenerative
Corrosion Control Using Regenerative Biofilms on Aluminum 2024 and Brass in Different Media—**149** (4) B130
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092

Regime
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98

Regular
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063

Reinforced
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383

Reinvestigation
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547

Relaxation
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41

Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520

Reliability
Reliability Characteristics of W/WN/TaO_xN_y/SiO_2/Si Metal Oxide Semiconductor Capacitors—**149** (7) G403

Relieving
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Remote
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92

Removal
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

ReO_3-Type
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391

Repassivation
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256

Residual
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Resistance
Noise Resistance Applied to Corrosion Measurements. VI. Partition of the Current Fluctuations Between the Electrodes—**149** (3) B89
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682
Preparation and Corrosion Resistance of Fe-Cr-Mo-C-B-P bulk Glassy Alloys—**149** (8) B366
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

Resistive
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35

Resistivities
Determination of Ionic and Electronic Resistivities in Carbon/Polyelectrolyte Fuel-Cell Composite Electrodes—**149** (12) A1541

Resistometry
Monitoring of Hydrogen Absorption into Titanium Using Resistometry—**149** (9) B422

Resistors
Effect of Boron and BF_2^+ Implant on Polysilicon Resistors—**149** (4) G271

Resistivity
Quantitative Analysis of the Morphology of Macropores on Low-Doped p-Si. Minimum Resistivity?—**149** (10) C511

Resonance
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Etching Characteristics of $Ba(Mg_{1/3}Ta_{2/3})O_3$ Film by Using Cl_2/SF_6-Electron Cyclotron Resonance Plasma—**149** (5) C280
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533

Resonant
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Response
Pulsed Current and Potential Response of Acid Copper System with Additives and the Double Layer Effect—**149** (5) C229
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025

Result
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297

Retention
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^7Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

Retrograde
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184

Reverse
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429

Reversible
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391
Morphology/Behavior Relationship in Reversible Electrochemical Lithium Insertion into Graphitic Materials—**149** (10) A1255

RF
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
RF Noise Characteristics of High-*k* $AlTiO_x$ and Al_2O_3 Gate Dielectrics—**149** (7) F69

RF-Sputtered
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597

Robust
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324

Roles
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148

Room
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362

Room-Temperature
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268

Rotating
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103
Low and High Frequency Pulse Current Plating of Copper onto a Rotating Disc Electrode—**149** (5) C289
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Roughness
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Route
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405

Ru
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56

Ru(II)-Dye
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

RuO_2
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187

RuO_2/Pb(Zr,Ti)O_3/RuO_2
Effect of Top Electrode Deposition Condition on Polarization Fatigue of RuO_2/Pb(Zr,Ti)O_3/RuO_2 Thin Film Capacitors—**149** (10) F152

RuO_x
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510

Ruthenium
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Ruthenium-Based
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146

S

Sacrificial
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555

Safety
Safety Aspects of Graphite Negative Electrode Materials for Lithium-Ion Batteries—**149** (8) A1020

Saline
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117

Salt
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Computational Study of Salt Association in Li-Ion Battery Electrolyte—**149** (4) A418
Study of $LiBF_4$ as an Electrolyte Salt for Li-Ion Battery—**149** (5) A586
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Recycling Kraft Pulping Chemicals with Molten Salt Electrolysis—**149** (9) D125
Formation of Carbon Nitride by Anode-Discharge Electrolysis of Molten Salt—**149** (11) D178
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Salt-Splitting
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21

Salts
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46
Galvanostatic Pulse Plating of Bulk Cu-Al Alloys on Nickel Electrodes from Room-Temperature Chloraluminate Molten Salts Containing Benzene—**149** (5) C268

Sample
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Sapphire
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603

Saran
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473

SB
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

Scaffold
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Scale
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Transient Adsorption and Desorption in Micrometer Scale Features—**149** (8) G461

Scanning
Cerium (III) Inhibition of Corrosion-Driven Organic Coating Delamination Studied Using A Scanning Kelvin Probe Technique—**149** (4) B154
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Investigation of Filiform Corrosion on Coated Aluminum Alloys by FTIR Microspectroscopy and Scanning Kelvin Probe—**149** (9) B403
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Scavenging
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35

Screen
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Se
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

Sealants
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607

Second
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Secondary
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
Carbon Hybrids Graphite-Hard Carbon and Graphite-Coke as Negative Electrode Materials for Lithium Secondary Batteries Charge/Discharge Characteristics—**149** (7) A804
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498

Segregation
Detection of Metal Segregation at the oxide-Silicon Interface—**149** (7) G429

Selective
Selective Dissolution below the Critical Potential and Back Alloying in Copper-Gold Alloy—**149** (2) B27
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Selectivity
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477

Self-Annealing
The Effect of Plating Current Densities on Self-Annealing Behaviors of Electroplated Copper Films—**149** (9) G535

Self-Charging
Photovoltaically Self-Charging Battery—**149** (9) A1208

Self-Regulation
Self-Regulation of the Cathodic Reaction Kinetics during Corrosion of AlCu Alloys—**149** (2) B52

Semiconductive
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227

Semiconductor
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394
Reliability Characteristics of W/WN/TaO_xN_y/SiO_2/Si Metal Oxide Semiconductor Capacitors—**149** (7) G403
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429
Electrical Characterization of GaN Metal Oxide Semiconductor Diodes Using MgO as the Gate Oxide—**149** (8) G482
An Oxynitride Gate Dielectric for Sub-30 Å Complementary Metal Oxide Semiconductor Devices Using Precombustion of Nitrous Oxide—**149** (9) G532
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

Sensitive
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19

Sensitization
Dye Sensitization of Natural Anatase Crystals with a Ruthenium-Based Dye—**149** (9) A1146

Sensitized
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Selective Electrodeposition of Cu-Nanostructures on Focused Ion Beam Sensitized p-Si—**149** (8) C432
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Sensor
Porous Al_2O_3 Nanogeometry Sensor Films. Growth and Analysis—**149** (1) H1

Electrochemical Sensor for Dissolved Carbon Dioxide Measurement—**149** (1) H28
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39
Stable Pd/V_2O_5 Optical H_2 Sensor—**149** (3) H76
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173

Separation
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160

Separators
Poly(ethylene oxide)-Based, Nanocomposite Electrolytes as Improved Separators for Rechargeable Lithium Polymer Batteries The Li/$LiMn_3O_6$ Case—**149** (2) A212

Serial
Common n- and p- Contact for Serial Wiring of Quaternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Series
Ionic Conductivity of an Extruded Nafion 1100 EW Series of Membranes—**149** (12) A1556

Sex
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464

SF_6/Ar
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179

Shape
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498

Shear
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383

Shell
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Short
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485

Shrinkage
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Si
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
Effects of the Addition of Silane during Carbonization on the Epitaxy of 3C-SiC on Si—**149** (9) G550
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472
Carbon-Coated Si as a Lithium-Ion Battery Anode Material—**149** (12) A1598
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633

Si(100)
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

Si(110)-SiO_2
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194

Si(111)
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245

Si(111)-SiO_2
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194

Si/SiGe
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209

$Si_{0.7}$
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301

SiC
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383

SiCOH
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92

Side
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607

SiGe
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394

SiH_4
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52

Silane
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Effects of the Addition of Silane during Carbonization on the Epitaxy of 3C-SiC on Si—**149** (9) G550

Silanes
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6

Silesquioxane
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455

Silica
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116
Interactions Between Nanoporous Silica and Copper—**149** (9) F122
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Silica-Based
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121

Silicate
Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43

Silicidation
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Silicide
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517

Silicided
Effect of Ion Implantation on Layer Inversion of Ni Silicided Poly-Si—**149** (9) G505

Silicon
Stable Blue Photoluminescence from Porous Silicon—**149** (1) C50
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Physics of Copper in Silicon—**149** (1) G21
Random and Ordered Macropore Formation in p-Type Silicon—**149** (1) G70
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
AC *vs.* DC Bias-Enhanced Nucleation of Highly Oriented Diamond on Silicon (100)—**149** (2) G114
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59
Silicon Oxide Nafion Composite Membranes for Proton-Exchange Membrane Fuel Cell Operation at 80 to 140°C—**149** (3) A256
Dimensional Constraints on High Aspect Ratio Silicon Microstructures Fabricated by HF Photoelectrochemical Etching—**149** (3) C180
Intrinsic Point Defects and Impurities in Silicon Crystal Growth—**149** (3) G167
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Defects in Silicon Crystals and Their Impact on Dram Device Characteristics—**149** (4) G226
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
Chemical Limitations of Macropore Formation on Medium-Doped p-Type Silicon—**149** (6) C338
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
Intrinsic Gettering of Copper in Silicon Wafers—**149** (6) G343
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Low-Damage Etching of Silicon Carbide in Cl_2-Based Plasmas—**149** (7) G420
Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
Influence of Depth-Inhomogeniety of Lifetime in Silicon Solar Cells—**149** (9) G522
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

Silicon-Based
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35

Silicon-on-Insulator
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490

Silicon-Rich-Oxide
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

SiLK
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521

Siloxane
Recovering Dielectric Loss of Low Dielectric Constant Organic Siloxane during Photoresist Removal Process—**149** (8) F81

Silsesquioxane
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9

Silver
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Superconformal Electrodeposition of Silver in Submicrometer Features—**149** (8) C423
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Silver-Silver
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98

Simplified
A Simplified Method for WO_3 Electrodeposition—**149** (11) C539

Simulated
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Simulating
Simulating Shape Changes during Electrodeposition Primary and Secondary Current Distribution—**149** (10) C498

Simulation
Monte Carlo Simulation of the Open-Circuit Potential and the Entropy of Reaction in Lithium Manganese Oxide—**149** (4) A493
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Simulation of the Direct Methanol Fuel Cell. III. Design and Optimization—**149** (6) A729
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Simulation
Newton-Krylov-Multigrid Algorithms for Battery Simulation—**149** (10) A1342

Single
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433

Single-Crystal
Homoepitaxial Single-Crystal Boron-Doped Diamond Electrodes for Electroanalysis—**149** (6) E179

Single-Particle
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983

Single-Wafer
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424

Single-Walled
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058

Single/Dual
Electromigration in On-Chip Single/Dual Damascene Cu Interconnections—**149** (7) G408

Sintering
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455

SiO_2
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Effect of Annealing Conditions on a Hafnium Oxide Reinforced SiO_2 Gate Dielectric Deposited by Plasma-Enhanced Metallorganic CVD—**149** (3) F18
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Effects of Plasma Activation on Hydrophilic Bonding of Si and SiO_2—**149** (6) G348
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573

SiO_2/Si
Growth of Epitaxial Beta-SiC at the SiO_2/Si Interface as a Result of Annealing in CO—**149** (4) G297
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539

(SiO4)6
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134

SiON/ZrO_2
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Sites
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163

Situ
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63

Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
In Situ, Real-Time Raman Microscopy of Embedded Single Particle Graphite Electrodes—**149** (8) A1100
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Situated
Electrical Effects of Anodic Bonding on Silicon Dioxide Situated in Pyrex Cavities—**149** (8) G497

Size
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114
A Convenient Method to Estimate Ion Size for Electrolyte Materials Design—**149** (10) A1385

Sizes
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Small-sized
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Sn
Study of Sn Coated Graphite as Anode Material for Secondary Lithium Ion Batteries—**149** (6) A675
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169

Sn-Ag-Cu
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Sn-Free
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521

Sn/Pd
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143

SnO_2
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153

Sodium
Sodium Salt-Splitting Performance of a Novel Ceramic-Polymer Composite Cation-Selective Membrane—**149** (1) D21
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Sodium-Ion
Negative Electrodes for Lithium- and Sodium-Ion Batteries Obtained by Heat-Treatment of Petroleum Cokes Below 1000°C—**149** (2) A201

SOFC
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797

SOFCs
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133

Soft
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149

Soft-Chemistry
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405

Soft-vs
Independence of the Soft Breakdown Phenomenon from the Gate Material Soft-*vs.* Hard-Gate Capacitors—**149** (10) F149

SOI
Assessment of Anomalous Behavior in Hydrodynamic Simulation of CMOS Bulk and Partially Depleted SOI Devices—**149** (10) G574

Sol-Gel
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481

Solar
The Inverted p-Diamond/n-CdTe Heterojunction Solar Cell—**149** (1) G55
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with TiO_2-WO_3 Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Influence of Depth-Inhomogeniety of Lifetime in Silicon Solar Cells—**149** (9) G522
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493

Solder
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Solid
High Performance Electrode for Medium-Temperature Solid Oxide Fuel Cells Control of Microstructure of La(Sr)CoO_3 Cathodes with Highly Dispersed Pt Electrocatalysts—**149** (1) A13
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
Current-Voltage Characteristics and Impedance Analysis of Solid Oxide Fuel Cells for Mixed H_2 and CO Gases—**149** (3) A227
Influence of Electrode Configuration on the Performance of Electrode-Supported Solid Oxide Fuel Cells—**149** (3) A325
Characterization of Si/SiGe Heterostructures on Si Formed by Solid Phase Reaction—**149** (3) G209
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode I. Mathematical Model—**149** (4) A437
Investigation of Mass-Transport Limitations in the Solid Polymer Fuel Cell Cathode. II. Experimental—**149** (4) A448
Chemical Interactions Between Aluminosilicate Base Sealants and the Components on the Anode Side of Solid Oxide Fuel Cells—**149** (5) A607
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166
Enhanced Silicon Oxidation by a Hyperthermal Beam Obtained from Laser Evaporation of Solid Ozone—**149** (5) F29
Influence of Moisture on Potentiometric Cl_2 Gas Sensor Using a Na^+ Conducting Solid Electrolyte—**149** (6) H123
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
Ni/Ceria Cermet as Anode of Reduced-Temperature Solid Oxide Fuel Cells—**149** (7) A927
Modeling the Effects of Ion Association on Alternating Current Impedance of Solid Polymer Electrolytes—**149** (7) E242
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
Fabrication of High-Performance Ni/Y_2O_3-ZrO_2 Cermet Anodes of Solid Oxide Fuel Cells by Ion Impregnation—**149** (9) A1175
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132
Oxidation of Nitrite on Solid Electrodes II. Determination of the Reaction Mechanism on Surfaces Covered by an Oxide Layer—**149** (10) E357
Ni Catalyst for Hydrogen Conversion in Gadolinia-Doped Ceria Anodes for Solid Oxide Fuel Cells—**149** (11) A1466
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521
Performance of Solid Oxide Fuel Cells with LSGM-LSM Composite Cathodes—**149** (12) A1565

Solid-Oxide
Cu-Ni Cermet Anodes for Direct Oxidation of Methane in Solid-Oxide Fuel Cells—**149** (3) A247

Solid-State
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
A Solid-State Potentiometric Sensor Based on Polybenzimidazole for Hydrogen Determination in Air—**149** (6) H119
Solid-State Electrochemical Probing of Atmospheric and Galvanic Corrosion—**149** (7) B328
All Solid-State Li/Li_xMnO_2 Polymer Battery Using Ceramic Modified Polymer Electrolytes—**149** (8) A967
In Situ Resonance Raman Microspectroscopy of a Solid-State Dye-Sensitized Photoelectrochemical Cell—**149** (11) E413
Solid-State Amperometric Hydrogen Sensor Using Pt/C/Nafion Composite Electrodes Prepared by a Hot-Pressed Method—**149** (11) H173

Solution
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159
Electrochemical Characterization of Catalytic Activities of Manganese Oxides to Oxygen Reduction in Alkaline Aqueous Solution—**149** (4) A504
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Electric Double-Layer Capacitance of Meso/Macroporous Activated Carbon Fibers Prepared by Blending Method I. Nickel-Loaded Activated Carbon Fibers in Propylene Carbonate Solution Containing $LiClO_4$ Salt—**149** (7) A855
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472
Electrochemical Study of Passive Layers Formation on Lead-Base Alloys Immersed in 5.31 M H_2SO_4 Solution—**149** (12) B543
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

Solutions
Electrolyte Solutions for Rechargeable Magnesium Batteries Based on Organomagnesium Chloro-Aluminate Complexes—**149** (2) A115
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256
Silicon Anodization in HF Ethanoic Solutions Competition Between Pore Formation and Homogeneous Dissolution—**149** (6) C331
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
Electrochemistry of Copper in Aqueous Ethylenediamine Solutions—**149** (7) B340
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409
Metal Deposition onto a Porous Silicon Layer by Immersion Plating from Aqueous and Nonaqueous Solutions—**149** (9) C456
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491

Solvation
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045

Solvent
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217
Electrochemical Polymerization of Aniline in Proton-Free Nonaqueous Media Dependence of Microstructure and Electrochemical Properties of Polyaniline on Solvent and Dopant—**149** (4) D51
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912
The Lithium/Sulfur Rechargeable Cell Effects of Electrode Composition and Solvent on Cell Performance—**149** (10) A1321

Spark-Plasma
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455

Spatial
Effect of Spatial Distribution of Electronic and Ionic Currents on the Magnetic Field Induced by Galvanic Corrosion—**149** (3) B65
Spatial Interactions Among Localized Corrosion Sites Experiments and Modeling—**149** (5) B163

Spatially
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248

Species
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Specific
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

Spectra
Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89

Spectrochemical
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12

Spectroelectrochemical
Electrochemical and Spectroelectrochemical Studies on Copolymerization of Diphenylamine with 2,5-Diaminobenzenesulfonic Acid—**149** (8) E298

Spectrometric
Mass Spectrometric Study of Oxidation of SiC in Low-Pressure Oxygen—**149** (4) J47

Spectrometry
On the Use and Limits of Mass Spectrometry for the Characterization of Fluorocarbon Emission during Plasma Processing—**149** (5) G318

Spectroscopic
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206
Raman and AC Impedance Spectroscopic Studies on Roles of Polyacrylonitrile in Polymer Electrolytes—**149** (5) E148
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939

Spectroscopy
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117
In Situ 50°C FTIR Spectroscopy of Pt and PtRu Direct Methanol Fuel Cell Membrane Electrode Assembly Anodes—**149** (5) A554
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates II. Electrochemical Impedance Spectroscopy and Mechanism of Discharge of the Plate—**149** (5) A654
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
The Behavior of Polypyrrole-Coated Electrodes in Dry Propylene Carbonate Solutions II. Kinetics of Electrochemical Doping Studied by Electrochemical Impedance Spectroscopy—**149** (6) E215
Solvation of Lithium Ions in Mixed Organic Electrolyte Solutions by Electrospray Ionization Mass Spectroscopy—**149** (8) A1045
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491
Electrochemical Impedance Spectroscopy of Epoxy-Vinyl Coating in Aqueous Medium Analyzed by Dipolar Relaxation of Polymer—**149** (11) B520
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Speed
A Model of Chemical Mechanical Polishing II. Polishing Pressure and Speed—**149** (5) G305

Supercapacitors
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973

Spinel
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Synthesis and Electrochemical Properties of $LiCo_2O_4$ Spinel Cathodes—**149** (2) A162
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995

Spinel-Based
Studies on Capacity Fade of Spinel-Based Li-Ion Batteries—**149** (1) A54

Spinel-like
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157

Spinel-Type
Electrochemical Deposition of Spinel-Type Cobalt Oxide from Alkaline Solution of Co^{2+} with Glycine—**149** (3) C159

Spinels
A ^7Li NMR Study of Capacity Fade in Metal-Substituted Lithium Manganese Oxide Spinels—**149** (5) A574
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^7Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

Spinning
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030

Spontaneously
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4

Spring
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97

Sputter
Increasing Proton Exchange Membrane Fuel Cell Catalyst Effectiveness Through Sputter Deposition—**149** (3) A280
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868

Sputtered
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487

Sputtering
Roles of Hydrogen on the Composition and Bonding of Atoms in Hydrogenated Aluminum Nitride Films Prepared by RF Reactive Sputtering—**149** (1) G51
Influence of the Carbon Sputtering Conditions on Corrosion Protection of the Magnetic Layer by an Electrochemical Technique—**149** (3) B84

SQUID
The Influence of Covalence on Capacity Retention in Metal-Substituted Spinels ^7Li NMR, SQUID, and Electrochemical Studies—**149** (11) A1409

$Sr_{1-x}Bi_{2+y}Ta_2O_9$
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4

Sr_3La_6
Luminescent Properties of Eu^{3+} in Defect Apatite, $Sr_3La_6(SiO_4)_6$—**149** (7) H134

$SrFe_yCo_zO_x$
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113

$SrGa_2S_4$:Ce
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165

$SrO.Al_2O_3:Eu^{2+}$
Influence of B_2O_3 on Matrix Forming Process and Luminescent Properties of $SrO.Al_2O_3:Eu^{2+}$ Phosphor—**149** (3) H65

$SrTiO_3$
Surface Kinetics of Oxygen Incorporation into $SrTiO_3$—**149** (2) J19

$SrTiO_3$:Pr,Al,Ga
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44

Stability
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
The Role of Oxygen on the Stability of Crevice Corrosion—**149** (6) B198
Phase and Layer Stability of Ni-and Ni(Pt)-Silicides on Narrow Poly-Si Lines—**149** (6) G331
Interfacial Stability between Lithium and Fumed Silica-Based Composite Electrolytes—**149** (9) A1121
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572
The Phase Stability of Cerium Species in Aqueous Systems I. E-pH Diagram for the Ce-$HClO_4$-H_2O System—**149** (12) C623

Stabilization
Stabilization of Platinum Anode Catalyst in a H_2S-O_2 Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808

Stabilized
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59

Stable
Stable Blue Photoluminescence from Porous Silicon—**149** (1) C50
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242
Stable Pd/V_2O_5 Optical H_2 Sensor—**149** (3) H76
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable Ti/TiO_2/Pt Electrode—**149** (7) B306

Stack
Electrical Characteristics of High-k Metal Oxide/SiO_2 Stack Gate Dielectric Prepared by Reaction of Metal with SiO_2—**149** (1) F1
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069

Stacked
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472

Stacking
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73

Stacks
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Stage
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301

Staging
Staging Phase Transitions in Li_xCoO_2—**149** (12) A1604

Stainless
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534

State
Effect of Oxygen Nonstoichiometry on $La_{1-x}A_xMnO_{3+\delta}$ Cathode under Polarized State—**149** (5) A531
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644

State-of-Charge
Cycle Performance in Each State-of-Charge in $LiMn_2O_4$—**149** (12) A1514

States
Improved Conducting States Induced by an Electrochemical Charging Process in Polyaniline Film Doped with New Dopants—**149** (4) A478
Organosulfur/Conducting Polymer Composite Cathodes II. Spectroscopic Determination of the Protonation and Oxidation States of 2,5-Dimercapto-1,3,4-Thiadiazole—**149** (7) A939

Steady-State
Nb Electrodissolution in Acid Fluoride Medium Steady-State and Impedance Investigations—**149** (10) B457
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Steel
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143
Corrosion and Its Mechanism of Al-10% Si Alloy-Coated Steel in Methanol Containing H_2O, NaCl and HCOOH—**149** (3) B75
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
Corrosion Behavior of Stainless Steel and Aluminum in a Downstream Environment of CF_4/O_2 Microwave Plasma—**149** (7) B297
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393
CO_2 Corrosion of Bare Steel under an Aqueous Boundary Layer with Oxygen—**149** (11) B479
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534

Steels
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393

Stepping
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164

STM
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117

Stoichiometric
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114

Stoichiometry
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537

Stopped-Flow
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12

Storage
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
A Nonaqueous Asymmetric Hybrid $Li_4Ti_5O_{12}$/Poly(fluorophenylthiophene) Energy Storage—**149** (3) A302
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
A Co-Free AB_5-Type Hydrogen Storage Alloy for Nickel-Metal Hydride Batteries: $LmNi_{4.0}Al_{0.3}Si_{0.1}Fe_{0.6}$—**149** (4) A462
The Characterization of an Alkaline Fuel Cell That Uses Hydrogen Storage Alloys—**149** (5) A603
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829

Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

Strain
In Situ Electrochemical Strain Gage Monitoring of Actuation in Conducting Polymers—**149** (8) E281

Strategies
Nonanomalous Codeposition of Iron-Nickel Alloys Using Pulse-Reverse Electroplating Through Means of Experimental Strategies—**149** (10) C492

Stream
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160

Streaming
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286

Strength
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455

Strengths
Effect of Nickel Coating on the Interfacial Shear Strengths of SiC Fiber Reinforced 7075 Aluminum Composites—**149** (8) C383

Stress
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139
Electrostatic Actuators with Intrinsic Stress Gradient II. Performance and Modeling—**149** (8) H146
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Strip
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87

Stripping
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

Strontium
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1

Structural
Investigation of Structural Fatigue in Spinel Electrode Using *In Situ* Laser Probe Beam Deflection Technique—**149** (1) A79
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Structural Stability of Metallorganic Chemical Vapor Deposited (Ba,Sr)RuO_3 Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597
A Raman Study of the Structural and Chemical Stability of a Poly(acrylonitrile) Matrix in Gel-Type Polymer Electrolytes—**149** (5) A662
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable $Ti/TiO_2/Pt$ Electrode—**149** (7) B306
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63
Effects of Hydrogen Implantation on the Structural and Electrical Properties of Nickel Silicide—**149** (9) G517
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}O_2$ and Their Structural Changes during Cycling—**149** (10) A1349
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Structure
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Modeling the Effects of Electrode Composition and Pore Structure on the Performance of Electrochemical Capacitors—**149** (2) A167
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
Structure, Electrical and Mechanical Properties Development during Curing of Low-k Hydrogen Silsesquioxane Films—**149** (3) F9
A Reversible Lithium Intercalation Process in an ReO_3-Type Structure: PNb_9O_{25}—**149** (4) A391
Local Structure and First Cycle Redox Mechanism of Layered $Li_{1.2}Cr_{0.4}Mn_{0.4}O_2$ Cathode Material—**149** (4) A431
Synthesis, Structure, and Electrochemical Behavior of $Li[Ni_xLi_{1/3-2x/3}Mn_{2/3-x/e}]O_2$—**149** (6) A778
Analysis of Defect Structure of the Proton-Conducting Oxide $CaZr_{0.9}In_{0.1}O_{3-\delta}$ by a DC-Polarization Technique—**149** (7) D104
Effect of Crystal Structure on the Behavior of Diamond Electrodes: Electrochemical Characteristics of Individual Crystal Faces—**149** (7) E260
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
Interface Characteristics of SiO_2/Si Structure with High Energy Boron Implantation—**149** (9) G539
Lithium Electrochemical Deintercalation from 02-$LiCo0_2$. Structure and Physical Properties—**149** (10) A1310
Structure and Electrochemistry of $Li[Ni_xCo_{1-2x}Mn_x]O_2$ ($O< x < 1/2$)—**149** (10) A1332
Preparation, Structure, Magnetic and Magnetotransport Properties of Electrodeposited Co(Ru)/Ru Multilayers—**149** (10) C469
Structure and Electrochemistry of Layered $Li[Cr_xLi_{(1/3-x/3)}Mn_{(2/3-2x/3)}]O_2$—**149** (11) A1454
Structure and Application of Various Saran Based Carbons to Aqueous Electric Double-Layer Capacitors—**149** (11) A1473
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509
Evaluation of the Crystal Structure, Film Properties, and Bs of Electroplated CoNiFe Films—**149** (12) C642
Chemically Bonded Porogens in Methylsilsesquioxane I. Structure and Bonding—**149** (12) F161

Structure-Dependent
Structure-Dependent Solvent and Ion Intercalation in Reduced and Oxidized Nickel Hexacyanoferrates—**149** (6) E195

Structures
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. I. Contact Mechanics Modeling—**149** (1) G31
Evolution of Copper-Oxide Damascene Structures in Chemical Mechanical Polishing. II. Copper Dishing and Oxide Erosion—**149** (1) G41
Adlayer Structures of Cl and Br and Growth of Bulk AgBr Layers on Ag(100) Electrodes—**149** (2) E19
Electrodeposition of Tin Needle-Like Structures—**149** (3) C150
Pyrolysis of Negative Photoresists to Fabricate Carbon Structures for Micro-electromechanical Systems and Electrochemical Applications—**149** (3) E78
Interdiffusions and Reactions in Cu/TiN/Ti/Thermal SiO_2 and Cu/TiN/Ti/Hydrogen Silesquioxane Multilayer Structures—**149** (8) G455
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490
Electrostatic Actuators with Intrinsic Stress Gradient I. Materials and Structures—**149** (8) H139

Structure
Li Magic Angle Spinning Nuclear Magnetic Resonance Study of the Cathode Materials $Li_{1+\alpha}Mn_{2-\alpha}O_{4-\delta}$ The Effect of Local Structure on the Electrochemical Properties—**149** (2) A103

Styrene
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Sub-Nanometer
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-Nanometer Surfaces—**149** (12) E479

Subjected
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Sublayer
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479

Sublimation
A Global Growth Rate Model for Aluminum Nitride Sublimation—**149** (1) G12

Submicrometer
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Superconformal Electrodeposition of Silver in Submicrometer Features—**149** (8) C423

Subquartermicrometer
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324

Substituents
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336

Substituted
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

Substitutional
Dopants in Diamond Nanoparticles and Bulk Diamond Density Functional Study of Substitutional B, N, P, SB, S, PN, O, NN, and Interstitial H—**149** (5) E143

Substrate
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
Displacement Reactions Between Metal Ions and Nitride Barrier Layer/Silicon Substrate—**149** (5) G309
The Correlation Between Substrate Mass Loss and Electrochemical Impedance Spectroscopy Data for a Polymer-Coated Metal—**149** (6) B265
Formation and Microstructures of Anodic Alumina Films from Aluminum Sputtered on Glass Substrate—**149** (7) B321
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Substrates
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100
Novel Cleaning Methodology for Steel Substrates in Microelectronic Fabrication—**149** (2) G143
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Electrochemical Preparation of p-Type Cupric and Cuprous Oxides on Platinum and Gold Substrates from Copper(II) Solutions with Various Amino Acids—**149** (11) C579
Electroless Plating of Copper on (100)-Oriented Single Crystal Silicon Substrates Modified by Plasma Graft Polymerization of 4-Vinylpyridine—**149** (11) C592

Subsurface
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494

Suggested
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Sulfate
Influence of Additives on Nucleation and Growth of Copper on n-Si (111) from Acidic Sulfate Solutions—**149** (2) C94
Evaluation of Lead Anode Reactions in Acid Sulfate Electrolytes II. Manganese Reactions—**149** (5) A558
Monte Carlo Simulation of the Electrodeposition of Copper I. Additive Free Acidic Sulfate Solution—**149** (8) C396
Monte Carlo Simulation of the Electrodeposition of Copper II. Acid Sulfate Solution with Blocking Additive—**149** (8) C406
Effect of Cold-Working in the Passive Behavior of 304 Stainless Steel in Sulfate Media—**149** (12) B534

Sulfidation
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40

Sulfide
A Physical and Mathematical Model for the Atmospheric Sulfidation of Copper by Hydrogen Sulfide—**149** (2) B40
All Solid-State Lithium Battery with $LiCo_{0.3}Ni_{0.7}O_2$ Fine Powder as Cathode Materials with an Amorphous Sulfide Electrolyte—**149** (6) A688
Effect of Sulfide on the Electrochemical Impedance of Copper in Benzotriazole Inhibited Media—**149** (6) B206

Pit Initiation at Single Sulfide Inclusions in Stainless Steel. I. Electrochemical Microcell Measurements—**149** (6) B272
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. III. Mathematical Model—**149** (6) B286
Removal of Hydrogen Sulfide from a Fuel Gas Stream by Electrochemical Membrane Separation—**149** (11) D160

Sulfite
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168

Sulfonated
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Sulfone
Investigation of the Lithium Couple on Pt, Al, and Hg Electrodes in Lithium Imide-Ethyl Methyl Sulfone—**149** (9) A1196

Sulfone-Based
Sulfone-Based Electrolytes for Lithium Ion Batteries—**149** (7) A920

Sulfur
Structural Factors of Sulfur Cathode with Poly(ethylene Oxide) Binder for Performances of Rechargeable Lithium Sulfur Batteries—**149** (11) A1437

Sulfur-Containing
Cathodic Behavior of Aromatic Polythioethers: Sulfur-Containing Molecular Asterisks as Redox Mediators—**149** (10) E389

Sulfuric
Investigation into Designed Current Oscillations during Electrodissolution in Sulfuric Acid Solution—**149** (5) B174
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
The Effect of Protic Doping Level on the Anticorrosion Characteristics of Polyaniline in Sulfuric Acid Solutions—**149** (9) B409

Sulfate
The Effects of Chloride Ions on the Electrowinning of Nickel from Sulfate Electrolytes—**149** (10) C506

Sulfuric
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulfuric Acid—**149** (7) D97

Super
Dissolution and Repassivation Kinetics of a 12.3Cr-2.6Mo-6.5Ni Super Martensitic Stainless Steel—**149** (6) B256
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Super-Stoichiometric
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829

Supercapacitor
A Study on the Preparation of NiO_x Electrode via Electrochemical Route for Supercapacitor Applications and Their Charge Storage Mechanism—**149** (3) A346
High-Capacitance Supercapacitor Using a Nanocomposite Electrode of Single-Walled Carbon Nanotube and Polypyrrole—**149** (8) A1058
An All-Solid-State Electrochemical Supercapacitor Based on Poly3-(4-fluorophenylthiophene) Composite Electrodes—**149** (10) A1376

Supercapacitors
Potentiodynamically Deposited Polyaniline on Stainless Steel Inexpensive and High-Performance Electrodes for Electrochemical Supercapacitors—**149** (11) A1393

Superconformal
Superconformal Electrodeposition of Silver in Submicrometer Features—**149** (8) C423
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Superfilling
Feature Superfilling in Copper Electrochemical Deposition—**149** (1) C74

Superlattices
Magnetic Properties of the Electrochemically Deposited Ni/Cu Superlattices—**149** (11) C607

Supported
The Electro-oxidation of Ethanol on Pt-Ru and Pt-Mo Particles Supported on High-Surface-Area Carbon—**149** (3) A272
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092
Electrochemical Hydrogenation of CFC-12 at Metal-Phthalocyanine Supported Gas-Diffusion Electrodes—**149** (11) D182

Supporting
Poly(3,4-Alkylenedioxythiophene)-Based Supercapacitors Using Ionic Liquids as Supporting Electrolytes—**149** (8) A973

Suppression
Suppression of Methanol Crossover and Distribution of Ohmic Resistance in Pt-Dispersed PEMs under DMFC Operation Experimental analyses—**149** (6) A682

Supramolecular
Enhanced Cyclability of Pi-Pi Stacked Supramolecular Oligomer (1,5-diaminoanthraquinone) as an Electrochemical Capacitor Material—**149** (4) A472

Surface
Surface Analysis of $LiMn_2O_4$ Electrodes in Carbonate-Based Electrolytes—**149** (1) A69
Evaluation of the Extent of Carbon Steel Surface Damage by Calcium Carbonate Scale—**149** (1) B1
Electroless Plating of Copper on Poly(tetrafluoroethylene) Films Modified by Surface Graft Copolymerization and Quaternization—**149** (1) C10
Electrochemical Li-Insertion Processes into Carbons Produced by Milling Graphitic Powders: The Impact of the Carbons' Surface Chemistry—**149** (2) A152
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
Oxidation of Nitrites on Solid Electrodes I. Determination of the Reaction Mechanism on the Pure Electrode Surface—**149** (2) E55
Surface Kinetics Model for SiLK Chemical Mechanical Polishing—**149** (2) G118
Assessment of Polishing-Related Surface Damage in Silicon Carbide—**149** (2) G131
Surface Kinetics of Oxygen Incorporation into $SrTiO_3$—**149** (2) J19
Role of the Metal and Surface Structure on the Electro-oxidation of Hydrazine in Acidic Media—**149** (3) D35
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41
Electrochemical Evaluation and Structural Characterization of Commercial $LiCoO_2$ Surface Modified with MgO for Lithium-Ion Batteries—**149** (4) A466
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139

Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189
Surface Processes Characterization for the Corrosion of Copper in Borate Solutions I. The Effect of Sodium Dodecylsulfate—**149** (7) B314
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367
Purely Hexagonal Graphite and the Influence of Surface Modifications on Its Electrochemical Lithium Insertion Properties—**149** (8) 7960
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278
Surface Characterization of Electrodes from High Power Lithium-Ion Batteries—**149** (10) A1358
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521
Determination of Chemical Diffusion and Surface Exchange Coefficients of Oxygen by Electrochemical Impedance Spectroscopy—**149** (11) E424
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Surface-Molecule
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

Surfaces
Initial Oxidation Processes on Hydrogenated Silicon Surfaces Studied by *In Situ* Raman Spectroscopy—**149** (1) G95
Electrodeposition of Keggin-Type Heteropolyanions on Different Electrode Surfaces from Nonaqueous Media—**149** (3) E96
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301
DC and Periodic Reverse Electroplating of Semiconductor Surfaces Having Adjacent P-Type and N-Type Areas—**149** (8) C429
Properties of Silicon (111) and (100) Surfaces Etched in Choline Solution—**149** (9) G543
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472
Electrochemical Oxidation of Alkylphenols at ECR-Sputtered Carbon Film Electrodes with Flat Sub-Nanometer Surfaces—**149** (12) E479

Surfactant
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103

Surfactants
Effects of Nonionic Surfactants on Oxide to Polysilicon Selectivity during Chemical Mechanical Polishing—**149** (8) G477

Surrounded
$LiMn_2O_4$ Cor Surrounded by $LiCo_xMn_{2-x}O_4$ Shell Material for Rechargeable Lithium Batteries—**149** (6) A694

Sustained
Sustained Potential Oscillations in Proton Exchange Membrane Fuel Cell with PtRu as Anode Catalyst—**149** (11) A1423

Sweep
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Syngas
Stable Mixed-Conducting Bilayer Membranes for Direct Conversion of Methane to Syngas—**149** (3) A242

Synthesis
Synthesis and Electrochemical Properties of $LiCo_2O_4$ Spinel Cathodes—**149** (2) A162
Synthesis and Characterization of Amorphous Hydrated $FePO_4$ and Its Electrode Performance in Lithium Batteries—**149** (3) A297
Implications of Reaction Mechanism and Kinetics on the Synthesis of Stoichiometric $LiNiO_2$—**149** (3) A331
Synthesis Cation Distribution and Electrochemical Properties of Fe-Doped Li_2MnO_3 ($0.15<Fe/(Fe+Mn)<0.75$) as a Novel 4V Positive Electrode Material—**149** (5) A509
Synthesis and Electrode Properties of Nanocrystalline Lithium Copper Iron Oxide Cathodes—**149** (5) A570
Synthesis and Structural Characterization of Carbon Powder by Electrolytic Reduction of Molten Li_2CO_3-Na_2CO_3-K_2CO_3—**149** (5) D72
Synthesis, Structure, and Electrochemical Behavior of $Li[Ni_xLi_{1/3-2x/3}Mn_{2/3-x/e}]O_2$—**149** (6) A778
Synthesis of Layered-Structure $LiMn_{1-x}Cr_xO_2$ by the Pechini Method and Characterization as a Cathode for Rechargeable Li/$LiMnO_2$ Cells—**149** (6) A792
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulfuric Acid—**149** (7) D97
Electrochemical Synthesis of Cyanoacetic Acid from Chloroacetonitrile and Carbon Dioxide—**149** (8) D113
Synthesis and Electrochemical Characteristics of $Li_{0.7}[Ni_{1/6}Mn_{5/6}]O_2$ Cathode Materials—**149** (9) A1250
Nanoparticle Synthesis and Electrocatalytic Activity of Pt Alloys for Direct Methanol Fuel Cells—**149** (10) A1299
Hydrothermal Synthesis of Orthorhombic $LiCo_xMn_{1-x}0_2$ and Their Structural Changes during Cycling—**149** (10) A1349
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472
Synthesis by EDTA-Based Soft-Chemistry Route and Characterization of Nanosized $LiCoO_2$ Cathode Materials—**149** (11) A1405
Synthesis and Study of New Cyclic Boronate Additives for Lithium Battery Electrolytes—**149** (11) A1460
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509
Combinatorial Synthesis of Tb-Activated Phosphors in the CaO-Gd_2O_3-Al_2O_3 System—**149** (12) H183

Synthesized
Influence of Crystallite Size on the Electrochemical Properties of Chemically Synthesized Stoichiometric $LiNiO_2$—**149** (9) A1114
Electrochemical Activity of Hydrothermally Synthesized Li-Ti-O Cubic Oxides toward Li Insertion—**149** (9) A1224
Metal Oxide Composites for Lithium-Ion Battery Anodes Synthesized by the Partial Reduction Process—**149** (9) A1237
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Synthetic
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53
A New Synthetic Route for Preparing $LiFePO_4$ with Enhanced Electrochemical Performance—**149** (7) A886

T

T2
T2 and 02 $Li_{2/3}[Co_xNi_{1/3-x/2}Mn_{2/3-x/2}]O_2$ Electrode Materials—**149** (8) A1083

Ta-N
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28

Ta_2O_5
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56

Ta_2O_5/Si
Effects of Plasma Prenitridation and Postdeposition Annealing on the Structural and Dielectric Characteristics of Ta_2O_5/Si System—**149** (7) F63

Tailored
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44

TaN
Sn/Pd Catalyzation and Electroless Cu Deposition on TaN Diffusion Barrier Layers—**149** (3) C143
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237

Tantalate
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44

Tantalum
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

TaN_x
Palladium Activation on TaN_x Barrier Films for Autocatalytic Electroless Copper Deposition—**149** (1) G85

TaO_xN_y
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529

Tap
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

Tarnish
Analysis of Tarnish Films on Copper Exposed in Hot Spring Area—**149** (3) B97

Tb-Activated
Combinatorial Synthesis of Tb-Activated Phosphors in the CaO-Gd_2O_3-Al_2O_3 System—**149** (12) H183

Te
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83

Te_{1-x}
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464

Technology
A Robust Multilevel Interconnect Module for Subquartermicrometer Technology Integration—**149** (5) G324
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
A Comparison of Bis[(perfluoroalkyl)Sulfonyl]imide Ionomers and Perfluorosulfonic Acid Ionomers for Applications in PEM Fuel-Cell Technology—**149** (12) A1527

Telluride
Electrodeposition of Antimony Telluride—**149** (10) C474

Temperature
A Highly Conductive Room Temperature Molten Fluoride: EMIF·2.3HF—**149** (1) D1
Improvement of the Low Temperature Performances of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Hydrogen Storage Alloy—**149** (2) A122
Effects of Temperature and Chloride Concentration on Pit Initiation and Early Pit Growth of Stainless Steel—**149** (2) B34
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Use of Organic Esters as Cosolvents in Electrolytes for Lithium-Ion Batteries with Improved Low Temperature Performance—**149** (4) A361
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
Silicon Metal-Oxide-Semiconductor Solar Cells with Oxide Prepared by Room Temperature Anodization in Hydrofluosilicic Acid Solution—**149** (6) G362
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_zO_x$ Thin Films—**149** (6) H113
La Doped $BaCoO_3$ as a Cathode for Intermediate Temperature Solid Oxide Fuel Cells Using $LaGaO_3$ Base Electrolyte—**149** (7) A823
The Influence of Operating Temperature on the Efficiency of Combined Fuel Cell and Power Cycle System—**149** (7) A879
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379
High Temperature Proton Conducting Organic/Inorganic Nanohybrids for Polymer Electrolyte Membrane (II)—**149** (8) A953
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526
In Situ Potential-Dependent FTIR Emission Spectroscopy A Novel Probe for High Temperature Fuel Cell Interfaces—**149** (10) A1293
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620
Reinvestigation of Lithium Reaction Mechanisms in FeS_2 Pyrite at Ambient Temperature—**149** (12) A1547
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

Temperature-Modulation
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399

Temperatures
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Effect of Al_2O_3-Coated-$LiMnO_2$ Cathodes Prepared at Various Temperatures on the 55°C-Cycling Behavior—**149** (2) A127
High Performance Anodes for SOFCs Operating in Methane-Air Mixture at Reduced Temperatures—**149** (2) A133
Mathematical Modeling of the Gas-Phase Chemistry in the Decomposition of Chlorosilanes in Mixtures of Carbon Dioxides and Hydrogen at High Temperatures—**149** (2) C112
In Situ Atomic Force Microscopy Study on Lithium Deposition on Nickel Substrates at Elevated Temperatures—**149** (4) A385
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407

Material Characterization of Cu-Fluorinated Silicate Glass and Cu/Organosilicate Glass Systems at Elevated Temperatures—**149** (5) F43
Oxidation of Arc Ion-Plated CrN Coatings at Elevated Temperatures—**149** (6) B234
The Reactions of $Li_{0.5}CoO_2$ with Nonaqueous Solvent at Elevated Temperatures—**149** (7) A912
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
Sol-Gel Derived Porous Silica Gels Impregnated with Sulfuric Acid. Pore Structure and Proton Conductivities and Medium Temperatures—**149** (8) E292
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562

Temperature-Sintered
Material and Organic Destruction Characteristics of High Temperature-Sintered RuO_2 and IrO_2 Electrodes—**149** (12) D187

Temperature
Residual Crystalline Silicon Phase in Silicon-Rich-Oxide Films Subjected to High Temperature Annealing—**149** (7) G376

Terbium-Related
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49

Ternary
The Corrosion Behaviors of the Ternary $Mg_{2-x}Mm_xNi$ Alloys—**149** (5) A543
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110
Electroless Nickel Ternary Alloy Deposition on SiO_2 for Application to Diffusion Barrier Layer in Copper Interconnects Technology—**149** (11) C573
Second Harmonic Generation in Electrochemically Synthesized Films of Ternary Metal Prussian Blue Analogs—**149** (11) E445

Test
PEO-$LiN(SO_2CF_2CF_3)_2$ Polymer Electrolytes III. Test in Batteries—**149** (10) A1282
Effect of Sample Configuration on the AMTEC Electrode/Electrolyte Characteristics Measurements in a Sodium Exposure Test Cell—**149** (11) A1432

Tested
Confocal Raman Spectroscopic Investigations of Fuel Cell Tested Sulfonated Styrene Grafted Poly(vinylidene fluoride) Membranes—**149** (2) A206

Testing
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132

Tethered
Ferrocene Groups Tethered to Clay Surfaces Effect of Surfactant Chain Length on Electroactivity—**149** (4) E103
Spectroscopic and Electrochemical Studies of Bilayer Lipid Membranes Tethered to the Surface of Gold—**149** (6) E189

Tetraalkylammonium
Performance Evaluation of Cleaning Solutions Enhanced with Tetraalkylammonium Hydroxide Substituents for Post CMP Cleaning on Poly-Si Film—**149** (6) G336

Tetrabutylammonium
Electrochemical Oxidation of Tetrabutylammonium Salts of Aliphatic Carboxylic Acids in Acetonitrile—**149** (3) D46

Tetracyanoquinodimethane
Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402

Tetrapropylammonium
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379

TFTs
Correlation Between Electrical Characteristics and Oxide/Polysilicon Interface Morphology for Excimer-Laser- Annealed Poly-Si TFTs—**149** (10) G567

Theoretical
A Theoretical and Experimental Analysis of Macrodecoration of Defects in Monocrystalline Silicon—**149** (2) G153
Theoretical Considerations of Electrochemical Phase Formation for an Ideal Frank-van der Merwe System Ag on Au(111) and Au(100)—**149** (4) E109
Mechanism for the Electro-oxidation of Carbon Monoxide on Platinum, Including Electrode Potential Dependence Theoretical Determination—**149** (10) E383

Theories
Anodic Stability of Several Anions Examined by *Ab Initio* Molecular Orbital and Density Functional Theories—**149** (12) A1572

Theory
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898
Oxide Networks, Graph Theory, and the Passivity of Cr-Mo, Cr-Zr, and Mo-Ti Binary Alloys—**149** (7) B333
The Effect of Si Doping in $(CdS)_{1-x-y}(ZnS)_xSi_y$ Photocatalysts Studied by Electrochemical Impedance Spectroscopy and Band Bending Theory—**149** (9) E317

Thermal
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59
Examination of the Si(111)-SiO_2, Si(110)-SiO_2, and Si(100)-SiO_2 Interfacial Properties Following Rapid Thermal Annealing—**149** (3) G194
Thermal Reactions Between Delithiated Lithium Nickelate and Electrolyte Solutions—**149** (4) A401
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266
Conductivity Enhancement and Thermal Properties of AgI-MO_2(M=Zr,Si) Composites Using Sol-Gel Derived Aerogels—**149** (6) A773
Enhancing Effect on Densification and Thermal Expansion Compatibility for $La_{0.8}Sr_{0.2}Cr_{0.9}Ti_{0.1}O_3$-Based SOFC Interconnect with B-site Doping—**149** (7) A797
Stacking Fault Growth Kinetics during Thermal Oxidation of Silicon in N_2O at High Temperatures and Pressures—**149** (7) F73
Implant Anneal Using Single-Wafer Furnace and a Lamp-Based Rapid Thermal Annealing System—**149** (7) G424
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978
Irreversible Expansion Behavior of $Mn_3O_{4+\delta}$ Spinel and Shrinkage Behavior of $La_{0.6}Sr_{0.4}MnO_3$ Composites with the Spinel during Thermal Cycling in O_2 Atmosphere—**149** (8) A995
Lithographic Characteristics and Thermal Processing of Photosensitive Sacrificial Materials—**149** (10) G555
Thermal Reactions of Cu/TiN/Ti/FSG and Cu/TiN/Ti/OSG Multilayers at Elevated Temperatures—**149** (10) G562
Thermal Oxidation of III-V Materials and Heterostructures—**149** (10) G581
Surface Modifications in Si after Rapid Thermal Annealing—**149** (12) G633

Thermochemically
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301

Thermodynamic
Simulation of the Direct Methanol Fuel Cell. I. Thermodynamic Framework for a Multicomponent Membrane—**149** (6) A710
Thermodynamic Analysis of Phase Diagrams of Binary Carbonates Based on a Regular Solution Model—**149** (8) A1063
Thermodynamic Analysis of Alumina Refractory Corrosion by Sodium or Potassium Hydroxide in Glass Melting Furnaces—**149** (12) B551

Thermoelectrochemical
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90

Thermogravimetry
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Thermophotovoltaic
Common n- and p- Contact for Serial Wiring of Quaternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

Thickness
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19
Composition, Structure, Stress, and Coercivity of Electrodeposited Soft Magnetic CoNiFe Films. Thickness and Substrate Dependence—**149** (1) C18
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479

Thickness/Coverage
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049

Thin
Laminated Thin Li-Ion Batteries Using a Liquid Electrolyte—**149** (1) A9
ESD Fabricated Thin Films of Spinel $LiMn_2O_4$ for Lithium Microbatteries. I. Effects of Thickness—**149** (1) A19
Impedance Studies of the Thin Film $LiMn_2O_4$/Electrolyte Interface—**149** (1) A61
Chemical Bath Deposition of Indium Oxyhydroxysulfide Thin Films. Effects of the Bath on Film Composition—**149** (1) C1
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Plasma-Enhanced Atomic Layer Deposition of Ta-N Thin Films—**149** (1) C28
Spontaneously Polarized $Sr_{1-x}Bi_{2+y}Ta_2O_9$ Thin Films Prepared by Metallorganic Decomposition—**149** (1) F4
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Role of Grain Boundaries in Exceptionally H_2 Sensitive Highly Oriented Laser Ablated Thin Films of SnO_2—**149** (1) H19
A Solid Oxide Fuel Cell with a Novel Geometry That Eliminates the Need for Preparing a Thin Electrolyte Film—**149** (2) A195
Microstructure and Thermal Stability of Aluminum Nitride Thin Films Deposited at Low Temperature on Silicon—**149** (2) G128
Material and Electrochemical Characterization of Tetrapropylammonium Manganese Oxide Thin Films as Novel Electrode Materials for Electrochemical Capacitors—**149** (4) A379
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Adhesion of Alumina Particles to Thin Films—**149** (4) G239
Plasma Chloriding of Thin Film Silver A Novel Process in Silver-Silver Chloride Reference Electrode Fabrication—**149** (4) H98
Electrochemical Impedance Studies of Methanol Electro-oxidation on Pt/C Thin Film Electrode—**149** (5) A615
Morphology and Magnetic Properties of Co Thin Films Electrodeposited on Si—**149** (5) C274
Reference Electrode Placement in Thin Solid Electrolytes—**149** (5) E166
Influence of Diffusion Plane Orientation on Electrochemical Properties of Thin Film $LiCoO_2$ Electrodes—**149** (6) A699
Temperature Dependence and Gas-Sensing Response of Conduction for Mixed Conducting $SrFe_yCo_2O_x$ Thin Films—**149** (6) H113
A Nanocrystalline NiO Thin Film Electrode Prepared by Pulsed Laser Ablation for Li-Ion Batteries—**149** (7) A873
Preparation of Cu-Co Alloy Thin Films on n-Si by Galvanostatic DC Electrodeposition—**149** (7) C363
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Doping Technology for Silicon Thin Films Grown by Temperature-Modulation Molecular Layer Epitaxy—**149** (7) G399
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Deposition of Amorphous Se_xTe_{1-x} Thin Film Alloys by a Novel Photochemical Deposition Technique and Their Analysis—**149** (9) C464
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
Deposition of HfO_2 Thin Films in HfI_4-Based Processes—**149** (10) F139
Effect of Top Electrode Deposition Condition on Polarization Fatigue of $RuO_2/Pb(Zr,Ti)O_3/RuO_2$ Thin Film Capacitors—**149** (10) F152
Cation Composition Control of MOCVD $(Ba,Sr)TiO_3$ Thin Films along a Capacitor Hole—**149** (10) G585
Composition, Structure and Electrochemical Behavior of Sol-Gel Derived Nanoparticulate Pt Thin Films—**149** (11) A1481
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584
Effect of CVD Temperature on Orientation, Roughness, and Chemical Mechanical Polish Removal Rate of W Thin Films—**149** (12) G648

Thin-Film
Formation and Characterization of Electroless-Deposited $NiTe_2$ Back Contacts to CdTe/CdS Thin-Film Solar Cells—**149** (2) G147
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Aqueous Electrochemistry of C_{60} Incorporated in Artificial Lipid Thin-Film on a p-Type Semiconductive Diamond Electrode—**149** (7) E227
Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391
Fabrication and Testing of a Doped Lanthanum Gallate Electrolyte Thin-Film Solid Oxide Fuel Cell—**149** (9) A1132
The Effect of Al_2O_3 Coating on the Cycle Life Performance in Thin-Film $LiCoO_2$ Cathodes—**149** (10) A1337
Influence of Preparation Conditions on the Structural and Luminescent Properties of Blue-Emitting $SrGa_2S_4$:Ce Thin-Film Phosphors—**149** (10) H165
The Gas-Sensing Properties of MOCVD-Fe_2O_3 Thin-Film Doping by Sn—**149** (10) H169
High-Voltage Cycling Behavior of Thin-Film $LiCoO_2$ Cathodes—**149** (11) A1442

Thiosulfate
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite I. Reaction Mechanism—**149** (3) C164
Substrate (Ni)-Catalyzed Electroless Gold Deposition from a Noncyanide Bath Containing Thiosulfate and Sulfite II. Deposit Characteristics and Substrate Effects—**149** (3) C168
Pit Initiation at Single Sulfide Inclusions in Stainless Steel. II. Detection of Local pH, Sulfide, and Thiosulfate—**149** (6) B280

Thiourea
Effects of Thiourea and Polyoxyethylene Lauryl Ether on Electrodeposition of Sn-Ag-Cu Alloy as a Pb-Free Solder—**149** (5) C244

Thoria
Experimental Observations of a Thoria Oxide-Ion Sensor in a Molten Salt System—**149** (2) H39

Three-Dimensional
Nucleation and Three-Dimensional Growth: Deviation from Diffusion Control—**149** (4) C223

Ti
Electrochemical Characteristics of $LiNi_{0.5}Mn_{1.5}O_4$ Cathodes with Ti or Al Current Collectors—**149** (3) A339
The Etching of Ti Adhesion Layers in H_2O_2 Solutions—**149** (5) C256
Anodic Behavior of Ti in KOH Solutions, Ellipsometric and Micro-Raman Spectroscopy Studies—**149** (11) B491
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167
Excimer Laser-Induced Ti Silicidation to Eliminate the Fine-Line Effect for Integrated Circuit Device Fabrication—**149** (11) G609

Ti-Zr-V-Mn-Cr-Ni
Investigation on the Structural and Electrochemical Properties of Super-Stoichiometric Ti-Zr-V-Mn-Cr-Ni Hydrogen Storage Alloys—**149** (7) A829

$Ti/TiO_2/Pt$
High-Resolution Electrochemical, Electrical, and Structural Characterization of a Dimensionally Stable $Ti/TiO_2/Pt$ Electrode—**149** (7) B306

Time
Time Evolution of the Resistance of Arsenic, Phosphorous, and Boron-Doped Crystalline Silicon—**149** (3) G175

TiN
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52

Tin
Electrodeposited Tin Coating as Negative Electrode Material for Lithium-Ion Battery in Room Temperature Molten Salt—**149** (3) A319
Electrodeposition of Tin Needle-Like Structures—**149** (3) C150

TIN
TIN Alloy-Graphite Composite Anode for Lithium-Ion Batteries—**149** (5) A635

Tin
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030

TiN
Nucleation and Growth of Electrochemically Deposited Copper on TiN and Copper from a $Cu\text{-}NH_3$ Bath—**149** (8) C390

TiO_2
Determination of Porosity of TiO_2 Films from Reflection Spectra—**149** (2) C89
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with $TiO_2\text{-}WO_3$ Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155
Stabilization of Platinum Anode Catalyst in a $H_2S\text{-}O_2$ Solid Oxide Fuel Cell with an Intermediate TiO_2 Layer—**149** (7) A808
The Preparation of Porous TiO_2 by Immersing Ti in NaOH Solution—**149** (11) D167
Improved Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized Solar Cells with Polypyrrole-Anchored TiO_2 Films—**149** (12) E493
Effect of Hydrogen on the Formation of Porous TiO_2 in Alkaline Solution—**149** (12) F186

$TiO_2\text{-}WO_3$
Enhanced Photocurrent-Voltage Characteristics of Ru(II)-Dye Sensitized TiO_2 Solar Cells with $TiO_2\text{-}WO_3$ Buffer Layers Prepared by a Sol-Gel Method—**149** (5) E155

$TiSi_2$
Enhancement of $TiSi_2$ Formation during Rapid Thermal Annealing in N_2 by the Presence of Native Oxide—**149** (1) G1

Titanate
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Titania
Ionic Mobilities in Amorphous Anodic Titania—**149** (3) B70

Titanium
The Removal Selectivity of Titanium and Aluminum in Chemical Mechanical Planarization—**149** (3) G204
Characterization of Electrolytic Al_2O_3/CaP Composite Coatings on Pure Titanium—**149** (5) D79
Monitoring of Hydrogen Absorption into Titanium Using Resistometry—**149** (9) B422
Temperature Dependence of Crevice Corrosion Initiation on Titanium Grade-2—**149** (9) B440
Feasibility of Nitrogen (or Oxygen)-Incorporated Ruthenium Titanium Ternary Diffusion Barrier Suggested by a New Design Concept for Future High-Density Memory Capacitors—**149** (9) F110

Titanium-Copper
A Study of Anodic Films and Processes on Titanium-Copper Metallic Glasses—**149** (9) B450

Tolerance
Using Sputter Deposition to Increase CO Tolerance in a Proton-Exchange Membrane Fuel Cell—**149** (7) A868
CO Tolerance of Pd-Rich Platinum Palladium Carbon-Supported Electrocatalysts Proton Exchange Membrane Fuel Cell Applications—**149** (11) A1400

Tolerant
Development of a Novel CO Tolerant Proton Exchange Membrane Fuel Cell Anode—**149** (7) A862

Tool
Back-side Etching A Tool for Making Morphology Gradients in Porous Silicon—**149** (12) C648

Tools
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

Top
Effect of Top Electrode Deposition Condition on Polarization Fatigue of $RuO_2/Pb(Zr,Ti)O_3/RuO_2$ Thin Film Capacitors—**149** (10) F152

Transfer
Direct Electrodeposition of Polypyrrole on Aluminum and Aluminum Alloy by Electron Transfer Mediation—**149** (3) C173
A Thermoelectrochemical Transfer Function analysis of Nickel Electrocrystallization in a Nonisothermal Cell—**149** (3) E90
Chemical Diffusion and Oxygen Surface Transfer of $La_{1-x}Sr_xCo0_{3-\delta}$ Studied with Electrical Conductivity Relaxation—**149** (3) J41

Transformations
Structural Transformations in Lithiated $\eta'\text{-}Cu_6Sn_5$ Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736

Transient
Transient Quarts Crystal Microbalance Behaviors Compared—**149** (1) H33
Phenomena That Limit the Capacity of the Positive Lead Acid Battery Plates I. The Charge Potential Transient as an Indicator of Positive Plate State of Charge and State of Health—**149** (5) A644

Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Transient Adsorption and Desorption in Micrometer Scale Features—**149** (8) G461
Transient Enhanced Diffusion of B in Si Implanted with Decaborane Cluster Ions—**149** (8) G474

Transistors
Proton and Gamma-Ray Irradiation Effects on InGaP/GaAs Heterojunction Bipolar Transistors—**149** (4) G213
Effects of High Energy Proton Irradiation on DC Performance of GaAs Metal-Semiconductor Field Effect Transistors—**149** (4) G236
Fabrication of High Performance Low-Temperature Poly-Si Thin-Film Transistors Using a Modulated Process—**149** (4) H93
Poly-Si Thin-Film Transistors Crystallized by Electron-Beam Annealing—**149** (7) G391
Parasitic Channels in SiGe Heterojunction p-Metal Oxide Semiconductor Field Effect Transistors—**149** (7) G394
Impact of Indium and Boron Interaction on Device Performance for Short and Narrow Channel n-Metal oxide Semiconductor Field Effect Transistors—**149** (8) B485
Comparison of Surface Passivation Films for Reduction of Current Collapse in AlGaN/GaN High Electron Mobility Transistors—**149** (11) G613

Transition
Electrochemical Oxidation of Transition Metal-Based Mediators for Pulp Delignification—**149** (1) D15
Electrochemical Reduction of CO_2 with Transition Metal Phthalocyanine and Porphyrin Complexes Supported on Activated Carbon Fibers—**149** (6) D89
Factors Influencing the Layered to Spinel-like Phase Transition in Layered Oxide Cathodes—**149** (9) 41157

Transitions
High Energetic Transitions in Pr^{3+}-Doped Polycrystalline $LiCaAlF_6$ and $LiSrAlF_6$—**149** (2) J27
In Situ Investigation of Phase Transitions of $Li_{1+y}Mn_{2-y}O_4$ Spinel during Li-Ion Extraction and Insertion—**149** (7) A842
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381
Combined Effects of Ni and Li Doping on the Phase Transitions in Li_xCoO_2: Electrochemical and ^7Li Nuclear Magnetic Resonance Studies—**149** (12) A1533
Staging Phase Transitions in Li_xCoO_2—**149** (12) A1604

Transmission
Pt Doping of SnO_2 Thin Films A Transmission Electron Microscopy Analysis of the Porosity Evolution—**149** (8) H153
Transmission Electron Microscopy of Non-Thickness-Limited Anodic Films on Tantalum—**149** (12) B531

Transparent
Effect of Au Overlayer on Thermal Stability of Pt Transparent Ohmic Contact on P-Type GaN—**149** (4) G266

Transpassive
Transpassive Dissolution Mechanism of Ni-Based Alloys in a Simulated Bleaching Solution Effect of Alloying Elements—**149** (11) B499

Transport
Electrochemistry and Mass Transport in Polymer Electrolyte Membrane Fuel Cells. I. Model—**149** (1) A31
Effect of Mass Transport on Si Electrodissolution in Aqueous Hydrazine—**149** (1) C37
Ionic Transport in Anodically Oxidized Al/W Layers—**149** (2) B23
Electrochemical and Hydrogen Transport Kinetic Performance of $MlNi_{3.75}Co_{0.65}Mn_{0.4}Al_{0.2}$ Metal Hydride Electrode at Various Temperatures—**149** (4) A407
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Transport Properties of Lithium Hectorite-Based Composite Electrolytes—**149** (6) A667
Simulation of the Direct Methanol Fuel Cell II. Modeling and Data Analysis of Transport and Kinetic Phenomena—**149** (6) A718
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
Microstructure of Poly(Vinylidene fluoride)-Based Polymer Electrolyte and Its Effect upon Transport Properties—**149** (9) A1230
Electrochemical Oxygen Separation Using Solid Electrolyte Ion Transport Membranes—**149** (9) D132

Treated
Microroughness and Composition of Cyanide Treated $CuInS_2$—**149** (1) G77
Characterization of Si(111) Surfaces Treated in NH_4F and NH_4HF_2 Solutions—**149** (4) G245

Treatment
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Electrochemical Treatment of Industrial Wastewater Containing Phenols—**149** (5) D57
The Annihilation of the Flow Pattern Defects in Czochralski Silicon Crystal by High Temperature Heat Treatment—**149** (7) G379
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441
A Process for Photoresist Removal after Aluminum Etching Using Plasma Treatment in a Gas Containing Hydrogen—**149** (8) G451
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145
Band Bending and Nonradiative Recombination at Si Surfaces during Electrochemical Treatment in Aqueous Fluoride Solution—**149** (11) E472

Treatments
Behavior of Impurity and Minor Alloying Elements during Surface Treatments of Aluminum—**149** (4) B139
Modification of Low Dielectric Constant Fluorinated Amorphous Carbon Films by Multiple Plasma Treatments—**149** (7) G384
Study on Sapphire Surface Preparation for III-Nitride Heteroepitaxial Growth by Chemical Treatments—**149** (11) G603

Trench-Like
Enhanced Transport by Acoustic Streaming in Deep Trench-Like Cavities—**149** (4) G286

Trenches
Modeling of Transient Electrochemical Systems Involving Moving Boundaries Parametric Study of Pulse and Pulse-Reverse Plating of Copper in Trenches—**149** (6) C324

Triangular
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Trichloride
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130

Trichloroethylene
Trichloroethylene Sensor by Using Electrodeposited Pb-Modified Graphite Strip Electrode—**149** (3) H87

Trifluoropropylene
Binary Mixed Solvent Electrolytes Containing Trifluoropropylene Carbonate for Lithium Secondary Batteries—**149** (2) A217

Trimethylaluminum
Atomic Layer Deposition of Al_2O_3 Thin Films Using Trimethylaluminum and Isopropyl Alcohol—**149** (6) C306

Trimethylchlorosilane
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145

Tris(2,2,2-Trifluoroethyl
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Tungsten
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6
Study of Conditions for Anisotropic Plasma Etching of Tungsten and Tungsten Nitride Using SF_6/Ar Gas Mixtures—**149** (3) G179
Effects of Oxygen Partial Pressure and Annealing Temperature on the Formation of Sputtered Tungsten Oxide Films—**149** (3) H81
Effect of pH on the Anodic Behavior of Tungsten—**149** (6) B224

Tunnel
Synthesis, Structure, and Electrochemical Properties of a New Cathode Material, $LiFeO_2$, with a Tunnel Structure—**149** (12) A1509

Tunneling
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117
In Situ Local Dissolution of Duplex Stainless Steels in 1 M H_2SO_4 + M NaCl by Electrochemical Scanning Tunneling Microscopy—**149** (6) B187
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286
Adlayers of Benzotriazole on Cu(110), (100), and (111) in $HClO_4$ Solution. *In Situ* Scanning Tunneling Microscopy Study—**149** (10) E367

Turnover
Optimizing Turnover of a Cobalt Corrin-Polyion Scaffold on Electrodes in Microemulsions with a Flow Reactor—**149** (12) D193

Two
Influence of Hydrogen in Iron and in Two Stainless Steels on Aqueous- and Gaseous Corrosion—**149** (9) B393
Observation of Two Kinds of Structural Phase Transitions in the $Ba_2In_2O_5$ System—**149** (10) A1381

Two-Component
Chemically Selective Force Mapping of Electrochemically Generated Two-Component Substituted Alkanethiol Monolayer Gradients by Pulsed-Force-Mode Atomic Force Microscopy—**149** (9) C450

U

Ultra-low
Formation and Microstructure of Mesoporous Silica Films with Ultra-low Dielectric Constants—**149** (9) F116

Ultrathin
In Situ Study of Ultrathin Film Formation on Au(111) Surface in Propylene Carbonate by Scanning Tunneling Microscopy under Potential Control—**149** (8) E286

Ultrahigh
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Ultralow
Trimethylchlorosilane Treatment of Ultralow Dielectric Constant Material after Photoresist Removal Processing—**149** (10) F145

Ultrashallow
Effect of Low Temperature Annealing Prior to Laser Annealing of an Ultrashallow n^+/p Junction—**149** (12) G661

Ultrathin
Effect of Oxygen in Deposited Ultrathin Silicon Nitride Film on Electrical Properties—**149** (4) F23
Kinetics and Mechanism of Carbon Incorporation in Ultrathin Silicon-Based Dielectric Films—**149** (5) F35
Magnetic Properties of Ultrathin Laminated Co/Cu Films Prepared by Electrodeposition—**149** (9) C439
Defect Generation in Ultrathin SiON/ZrO_2 Gate Dielectric Stacks—**149** (12) F181

Uncatalyzed
Oxygen Reduction on Uncatalyzed Carbon-PTFE Gas Diffusion Cathode in Alkaline Medium—**149** (2) E64

Undecylenic
Thermal Hydrosilylation of Undecylenic Acid with Porous Silicon—**149** (2) H59

Understanding
Understanding the Anomalous Capacity of Li/Li[$Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}$]$O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815
Precise Electrochemical Calorimetry of $LiCoO_2$/Graphite Lithium Ion Cell Understanding Thermal Behavior and Estimation of Degradation Mechanism—**149** (8) A978
Understanding Formation of Solid Electrolyte Interface Film on $LiMn_2O_4$ Electrode—**149** (12) A1521

Unitized
Development of Supported Bifunctional Electrocatalysts for Unitized Regenerative Fuel Cells—**149** (8) A1092

Unsaturated
The Use of Unsaturated Fluorocarbons for Dielectric Etch Applications—**149** (4) G276

UPD
Evidence for the Diffusion of Au Atoms into the Te UPD Layer Formed on a Au(111) Substrate—**149** (2) C83
Effect of the Electrolytic Conditions on the Coverage of the Cd UPD Layer Formed on an Au(111) Substrate—**149** (11) C586

Utilizing
Solid Oxide Fuel Cells Utilizing Dimethyl Ether Fuel—**149** (9) A1127

UV-Induced
Electroless Plating of Copper via a Sn-Free Process on Dielectric SiLK Surface Modified by UV-Induced Graft Copolymerization with 4-Vinylpyridine and 1-Vinylimidazole—**149** (10) C521

V

V_2O_5
Lithium Electroinsertion into an Inorganic-Organic Hybrid Material Composed from V_2O_5 and Polyaniline—**149** (5) A546
Rechargeable Lithium Battery Cells Fabricated Using Poly(methyl methacrylate) Gel Electrolyte and Composite of V_2O_5 and Polypyrrole—**149** (8) A988

$V_2O_5 \cdot nH_2O$
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Vacancy
Determination of Oxygen Vacancy Concentration in a Thin Film of $La_{0.6}Sr_{0.4}CoO_{3-\delta}$ by an Electrochemical Method—**149** (7) E252

Vacuum
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408

Valence
Relations Between Nanopore Size in Porous Silicon, the Dissolution Valence and the Hydrogen Evolution Ration in Anodization of Silicon—**149** (2) E35
Electrocatalysis of Oxygen Reduction on Polypyrrole/Mixed Valence Spinel Oxide Nanoparticles—**149** (5) A525

Validation
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Homogeneous and Heterogeneous Chemistry Models of the Codeposition of Silica, Alumina, and Aluminosilicates Development and Experimental Validation—**149** (11) C555

Validity
Electron-Transfer Stopped-Flow Method. Its Validity for Spectrochemical Analysis of Electrogenerated Cation Radicals—**149** (1) E12

Valve-Regulated
Factors Influencing Oxygen Recombination at the Negative Plate in Valve-Regulated Lead-Acid Batteries—**149** (7) A934

Vanadium
Vanadium Oxide-Carbon Nanotube Composite Electrodes for Use in Secondary Lithium Batteries—**149** (1) A26
Electrochemistry of Vanadium Oxides and Oxyhalides in Chloroaluminate Room Temperature Ionic Liquids—**149** (4) A371
RF-Sputtered Vanadium Oxide Films Effect of Film Thickness on Structural and Electrochemical Properties—**149** (5) A597

Vapor
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Microstructure of Copper Films Deposited on TiN Substrate by Metallorganic Chemical Vapor Deposition—**149** (1) C33
Precursors for Deposition of Strontium Bismuth Tantalate Films by Direct Liquid Injection-Metallorganic Chemical Vapor Deposition—**149** (1) C44
Metallorganic Chemical Vapor Deposited TiN Barrier Enhancement with SiH_4 Treatment—**149** (1) C52
Improved Morphological Stability of $CoSi_2$ Layer by *In Situ* Growth on Polycrystalline Silicon Using Reactive Chemical Vapor Deposition—**149** (1) G16
Nitrogen Implantation and *In Situ* HF Vapor Clean for Deep Submicrometer n-MOSFETs—**149** (1) G63
Chemical Vapor Deposition of HfO_2 Thin Films Using a Novel Carbon-Free Precursor. Characterization of the Interface with the Silicon Substrate—**149** (1) G89
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Silica from Mixtures of Chlorosilanes, Carbon Dioxide, and Hydrogen—**149** (2) C120
Development and Validation of a Mathematical Model for the Chemical Vapor Deposition of Alumina from Mixtures of Aluminum Trichloride, Carbon Dioxide, and Hydrogen—**149** (2) C130
Bottom-up Filling of Submicrometer Features in Catalyst-Enhanced Chemical Vapor Deposition of Copper—**149** (2) G109
Structural Stability of Metallorganic Chemical Vapor Deposited $(Ba,Sr)RuO_3$ Electrodes for Integration of High Dielectric Constant Thin Films—**149** (4) G232
Effects of TaN Substrate Pretreatment by Ar Plasma on Copper Chemical Vapor Deposition—**149** (5) C237
High-Temperature Kinetics of $AlCl_3$ Decomposition in the Presence of Additives for Chemical Vapor Deposition—**149** (5) C261
Investigating Contaminants on Thermochemically Refined Surfaces of Chemical Vapor Deposition Diamond Films—**149** (5) G301
Initial Stage of Amorphous Si and $Si_{0.7}$ Deposition on SiO_2 by Low-Pressure Chemical Vapor Deposition—**149** (6) C301
Metallorganic Chemical Vapor Deposition of Ru Films Using Cyclopentadienyl-Propylcyclopentadienlylruthenium(II) and Oxygen—**149** (6) C317
Deposition of La_2O_3 Films by Direct Liquid Injection Metal Organic Chemical Vapor Deposition—**149** (6) C345
Chemical Vapor Deposition of Silicon in a Lamp-Heated Reactor Effects of Heat Absorption, Emission and Conduction—**149** (6) C355
The Physical and Electrical Characteristics of Ta_2O_5 and Physical Vapor Deposited in Ru in Metal-Insulator-Metal Capacitors—**149** (6) F56
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92
Analysis of Pore and Pore-Related Properties in Plasma-Enhanced Chemical Vapor Deposition Low Dielectric Constant Films—**149** (9) F103
Chemical Vapor Deposited RuO_x Films. Effect of Oxygen Flow Rate—**149** (9) G510
Low Temperature 4H-SiC Epitaxial Growth on 4H-SiC (1120) and (1100) Faces by Organometallic Chemical Vapor Deposition—**149** (9) G526
Metallorganic Chemical Vapor Deposition of TaO_xN_y as a High-Dielectric-Constant Material for Next-Generation Devices—**149** (10) C529
Characterization of $LiCoO_2$ Thin Film Cathodes Deposited by Liquid-Delivery Metallorganic Chemical Vapor Deposition for Rechargeable Lithium Batteries—**149** (12) A1584

Vapor-Pressure-Dependent
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

Variable
Nonlinear Diffusion Behavior for the Prussian Blue Electrode II. Interpretation of Variable Diffusivity during the Insertion/Extraction Processes—**149** (2) E40

Variation
Spatially Controlled Microstructural Variation using a Free-Surface Flow Driven by a Rotating Cyclinder Electrode—**149** (6) B248
The Variation of Ohmic Contacts and Surface Characteristics on p-GaN Induced by Reactive Ion Etching—**149** (7) G367

Vat
Electrochemical Vat Dyeing. Combination of an Electrolyzer with a Dyeing Apparatus—**149** (1) D7

Vehicle
Electrochemical and Thermal Characterization of Battery Modules Commensurate with Electric Vehicle Integration—**149** (1) A45

Versatile
Silicon Oxynitride A Versatile Material for Integrated Optics Applications—**149** (8) F85

Vertical
Limiting Current of Tungsten Electrochemical Dissolution under Conditions of Natural Convection. Vertical Plane Electrode—**149** (1) E6

Vessel
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Via
Via Filling by Electrodeposition Superconformal Silver and Copper and Conformal Nickel—**149** (12) C637

Vinyltrimethysilane
Remote Plasma-Enhanced Chemical Vapor Deposition of Nanoporous Low-Dielectric SiCOH Films Using Vinyltrimethysilane Silane)—**149** (8) F92

Viologen
Electrochemistry of Langmuir-Blodgett Films Incorporating both a Viologen Derivative and Tetracyanoquinodimethane—**149** (10) E402
Electroreduction of Heptyl Viologen on Polycrystalline Silver Formation and Layer-by Layer Dissolution of the Bromide Salt of the Cation Radical Film—**149** (11) E440

Viscoelasticity
Characterization of the Viscoelasticity and the Surface Roughness of Electrochemically Prepared Conducting Polymer Films by Impedance Measurements as Quartz Crystals—**149** (9) E331

Vitro
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Volatility
Application of Volatility Diagrams for Low Temperature, Dry Etching, and Planarization of Copper—**149** (11) G620

Voltage
A Study on the Degradation of Cathodoluminescence of $SrTiO_3$:Pr,Al,Ga Phosphors Tailored for Low Voltage Display Applications—**149** (2) H44
High Voltage Lithium Polymer Cells Using a PAN-Based Composite Electrolyte—**149** (4) A414
Analysis of Transient Voltage Response on a 4 x 4 Molten Carbonate Fuel Cell by a Current Pulse Method—**149** (8) A1025
Mobile Ion Detection in Organosiloxane Polymer Using Triangular Voltage Sweep—**149** (10) F155

Voltammetry
Cyclic Voltammetry Investigation of a Metal Hydride Electrode for Nickel Metal Hydride Batteries—**149** (2) A137

Voltammetric
Voltammetric Studies of the Oxygen-Titanium Binary System in Molten Calcium Chloride—**149** (11) E455

Voltammetry
Examining a Potential Fuel Cell Poison. A Voltammetry Study of the Influence of Carbon Dioxide on the Hydrogen Oxidation Capability of Carbon-Supported PT and PtRu Anodes—**149** (2) A140
Voltammetry of Surface Redox Processes Perturbed by Dimerization and Adsorption of the Products Application to the Oxidation of 3-Mercaptopropanol on Mercury—**149** (2) E45
In Situ Atomic Force Microscopy Imaging of a Heteropolyanion onto a HOPG Electrode during Its Cycling Voltammetry—**149** (3) E84
Cyclic Voltammetry and AC Impedance of $MmNi_{3.55}Co_{0.75}Mn_{0.4}Al_{0.3}$ Alloy Single-Particle Electrode for Rechargeable Ni/MH Battery—**149** (8) A983
The Inhibition of Anomalous Codeposition of Iron-Group Alloys Using Cyclic Voltammetry—**149** (11) C615
Characterization of Differently Synthesized Pt-Ru Fuel Cell Catalysts by Cyclic Voltammetry, FTIR Spectroscopy, and in a Single Cells—**149** (11) E433
Apparent Anomaly during Rotating Disk Voltammetry in Ionic Liquids—**149** (11) E468

Volumetric
Reducing Carbon in $LiFePO_4$/C Composite Electrodes to Maximize Specific Energy, Volumetric Energy and Tap Density—**149** (9) A1184

W

W-poly
Boron Transport Through Surface Channel pMOS Using W-poly Metal Gate Electrode Poly Si Doping Condition and Nitric Oxide Treatment Effects—**149** (8) G441

W/WN/TaO_xN_y/SiO_2/Si
Reliability Characteristics of W/WN/TaO_xN_y/SiO_2/Si Metal Oxide Semiconductor Capacitors—**149** (7) G403

Wafers
In Situ Protection of Silicon Wafers Against Metal Contamination in Furnace Processes Without Environmental Hazard—**149** (3) G198
On the Impact of Nanotopography of Silicon Wafers on Post-Chemical Mechanical Polished Oxide Layers—**149** (4) G257
Intrinsic Gettering of Copper in Silicon Wafers—**149** (6) G343
Nondestructive Observation of Depths and Dimensions of Subsurface Microdefects in Czochralski-Grown and Epitaxial Silicon Wafers—**149** (8) G494
Chemical Mechanical Polishing of Cubic Silicon Carbide Films Grown on Si(100) Wafers—**149** (12) G643

Wall
On-Line Measurement of Glucose in a Rotating Wall Perfused Vessel Bioreactor Using an Amperometric Glucose Sensor—**149** (4) H103

Wastes
Electrochemical Oxidation of Aqueous Phenol Wastes Using Active and Nonactive Electrodes—**149** (8) D118

Wastewater
Electrochemical Treatment of Industrial Wastewater Containing Phenols—**149** (5) D57

Water
The Influence of Water Vapor on the Oxidation of Copper at Intermediate Temperatures—**149** (1) B14
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6
Water Transport in Polymer Electrolyte Membrane Electrolyzers Used to Recycle Anhydrous HCl I. Characterization of Diffusion and Electro-osmotic Drag—**149** (5) D63
Performance of Polymer-Electrolyte Water Electrolysis Cell Analyzed at Small-sized Experiment and Predicted at Large-Sized Stack—**149** (8) A1069
Barrier Effect of Electron Cyclotron Resonance Sputtered Films Against Water or Hydrogen Molecules Permeation—**149** (11) B487
Intensification of Water Electrolysis in a Centrifugal Field—**149** (11) D172

Waveforms
Effect of Current and Potential Waveforms on Sublayer Thickness on Electrodeposited Copper-Nickel Multilayers—**149** (10) C479

Wear
Corrosion Wear of High Molybdenum and Nitrogen Stainless Steel for Biomedical Applications—**149** (4) B146

Weight
Effects of Tris(2,2,2-Trifluoroethyl) Phosphate as a Flame-Retarding Cosolvent on Physicochemical Properties of Electrolytes of $LiPF_6$ in EC-PC-EMC of 3:3:4 Weight Ratios—**149** (11) A1489

Well
Implantation Induced Defects in the Retrograde Well with a Buried Layer—**149** (3) G184

Well-Ordered
Synthesis of Well-Ordered Nanopores by Anodizing Aluminum Foils in Sulfuric Acid—**149** (7) D97

Wells-Dawson
Investigation of Wells-Dawson Heteropoly Oxofluorotungstates by Scanning Tunneling Microscopy (STM) and Tunneling Spectroscopy—**149** (4) E117

Wet
Silicon Orientation Effects in the Initial Regime of Wet Oxidation—**149** (8) F98
Semiconductor Surface-Molecule Interactions Wet Etching of InP by A-Hydroxy Acids—**149** (11) G599

Wettability
Water Dispersible Silanes for Wettability Modification of Polysilicon—**149** (1) H6

Wire
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire—**149** (9) B387
In Vitro Corrosion Resistance of Orthodontic Super Stainless Steel Wire The Effects of Stress Relieving Heat-Treatment—**149** (9) B414

Wiring
Common n- and p- Contact for Serial Wiring of Quaternary Antimonide Monolithic Interconnect Module Thermophotovoltaic Devices—**149** (7) G416

WO_3
A Simplified Method for WO_3 Electrodeposition—**149** (11) C539

Working
A Working Model of Polymer Electrolyte Fuel Cells Comparisons between Theory and Experiments—**149** (7) A898

X

X-Ray
X-Ray Absorption Spectroscopic Study of $LiAl_yCo_{1-y}O_2$ Cathode for Li Rechargeable Batteries—**149** (2) A146
In Situ X-Ray Absorption Study of a Layered Manganese-Chromium Oxide-Based Cathode Material—**149** (2) A176
Structural Transformations in Lithiated η'-Cu_6Sn_5 Electrodes Probed by *In Situ* Mössbauer Spectroscopy and X-Ray Diffraction—**149** (6) A736
Understanding the Anomalous Capacity of $Li/Li[Ni_xLi_{(1/3-2x/3)}Mn_{(2/3-x/3)}]O_2$ Cells Using *In Situ* X-Ray Diffraction and Electrochemical Studies—**149** (7) A815

X-Ray
Li to Network Interaction in Electrochemically Lithiated Tin Hydrogen Phosphate. X-Ray Diffraction, ^7Li and ^{31}P Magic-Angle Spinning Nuclear Magnetic Resonance Study—**149** (8) A1030
Ideally Capacitive Behavior and X-Ray Photoelectron Spectroscopy Characterization of Polypyrrole Effects of Polymerization Temperatures and Thickness/Coverage—**149** (8) A1049
Characterization of the Silicon-on-Insulator Structures by High-Resolution X-Ray Diffraction—**149** (8) G490
Local Structure of Dilute Gallium Ions in $LiNi_{0.908}Co_{0.085}Ga_{0.003}O_2$ Cathode Material *In Situ* X-Ray Absorption Study—**149** (9) A1246
X-Ray Absorption Studies of Poly(vinylferrocene) Polymers for Anion Separation—**149** (9) D137
The Chemical Reaction of Diethyl Carbonate with Lithium Intercalated Graphite Studied by X-Ray Photoelectron Spectroscopy—**149** (10) A1286
Oxygen Contribution on Li-Ion Intercalation-Deintercalation in $LiAl_yCo_{1-y}O_2$ Investigated by O K-Edge and Co L-Edge X-Ray Absorption Spectroscopy—**149** (10) A1305
The Reactivity of Linear Alkyl Carbonates toward Metallic Lithium X-Ray Photoelectron Spectroscopy Studies in Ultrahigh Vacuum—**149** (10) E408
X-Ray Absorption Study of $Li_xMn_yFe_{1-y}PO_4$ ($O<x<1, O<y<1$)—**149** (11) A1414
Thermogravimetry and X-Ray Absorption Spectroscopy Study of Heated $V_2O_5 \cdot nH_2O$ Aerogels and Ambigels—**149** (12) A1589

Xerogels
Enhancement of Green Terbium-Related Photoluminescence from Highly Doped Microporous Alumina Xerogels in Mesoporous Anodic Alumina—**149** (2) H49

XPS
The Behavior of Polypyrrole-Coated Electrodes in Propylene Carbonate Solutions I. Characterization of PPy Films by a Combination of Electroanalytical Tools and XPS—**149** (6) E204

XRD
Kinetic Study of $LiMn_2O_4$ Cathodes by *In Situ* XRD with Constant- Current Cycling and Potential Stepping—**149** (9) A1164

XXVI
Electrochemistry of Conductive Polymers XXVI. Effects of Electrolytes and Growth Methods on Polyaniline Morphology—**149** (2) E26

Y

Y-Doped
A Solid Oxide Fuel Cell Using Y-Doped $BaCeO_3$ with Pd-Loaded FeO Anode and $Ba_{0.5}Pr_{0.5}CoO_3$ Cathode at Low temperatures—**149** (11) A1503

Y_2O_2S:Eu
Low-Voltage Cathodoluminescence Properties of the Y_2O_2S:Eu Red Light Emitting Phosphor Screen in Field-Emission Environments—**149** (7) H129

Y_2O_3
Changes in Aging Behavior and Defect Structure of Y2O3 Fully Stabilized ZrO_2 by In_2O_3 Doping—**149** (8) J59

Y_2O_3:Eu
A Synthetic Method for the Production of a Range of Particle Sizes for Y_2O_3:Eu Phosphor Using a Copolymer Microgel of NIPAM and AMPS—**149** (2) H53

Yb^{3+},Er^{3+}:$Y_3Al_5O_{12}$
Energy Back-Transfer and other Nonradiative Energy-Transfer Processes in Yb^{3+}, Er^{3+}:$Y_3Al_5O_{12}$—**149** (2) J31

Yield
Effect of Etching Process Deviations and Photoresist Stripping on Contact Yield of Copper Dual Damascene Metallization—**149** (12) G656

$YO_{1.5}$
Electronic Conductivity of 20 mol % $YO_{1.5}$ Doped CeO_2—**149** (11) E450

Ytterbia-Stabilized
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35

Yttria-Stabilized
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Yttrium
Kinetics of the Electrochemical Loading of Hydrogen into Thin Yttrium Films Covered by Palladium—**149** (10) D148
Optimization of Yttrium Aluminum Garnet:Ce^{3+} Phosphors for white Light-Emitting Diodes by Combinatorial Chemistry Method—**149** (11) J85

Yttrium-Doped
Electrical Properties of Yttrium-Doped Strontium Titanate under Reducing Conditions—**149** (1) J1

Z

Zeolite
Synthesis and Corrosion Resistance of High-Silica Zeolite MTW, BEA, and MFI Coatings on Steel and Aluminum—**149** (10) B472

Zero
Surface Chemical Processes in Chemical Mechanical Polishing Relationship Between Silica Material Removal Rate and the Point of Zero Charge of the Abrasive Material—**149** (12) G651

Zinc
The Influence of Salt Deposits on the Atmospheric Corrosion of Zinc. The Important Role of the Sodium Ion—**149** (2) B57
Preparation of Zinc Oxide Thin Films by Pulsed Current Electrolysis—**149** (7) F76
Electrochemical Study of Cadmium in Acidic Zinc Chloride-I-ethyl-3-Methylimidazolium Chloride Ionic Liquids—**149** (9) E348

Zinc-Substituted
Electrochemical Study of Zinc-Substituted Nickel Hydroxide—**149** (9) A1136

Zirconate
Integration of a CMOS Preamplifier with a Lead Zirconate Titanate Resonant Frequency Microsensor—**149** (7) J53

Zirconia
Precursor Scavenging of Resistive Grain-Boundary Phase in 8 mol% Ytterbia-Stabilized Zirconia—**149** (3) J35
Improvement of Mechanical Strength of 8 mol% Yttria-Stabilized Zirconia Ceramics by Spark-Plasma Sintering—**149** (4) A455
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte I. Modelling of Steady-State and Impedance Behavior—**149** (12) E497
Electrochemical Oxidation of CO on Pt and Ni Point Electrodes in Contact with an Yttria-Stabilized Zirconia Electrolyte II. Steady-State and Impedance Measurements—**149** (12) E506

Zirconium-Based
Surface Composition and Anodic Polarization Behavior of Zirconium-Based Amorphous Alloys n a Phosphate Buffered Saline Solution—**149** (4) B117

Zirconium(IV)
Adsorption and Reaction of Zirconium(IV) Nitrate on Polycrystalline Zirconia—**149** (10) F131

Zn-Mn
Electrodeposition of Zn-Mn Alloys at Low Current Densities—**149** (11) C600

$Zn_2SiO_4:Mn^{2+}$
Structural and Optical Properties of Oxidized Porous Silicon Layers Activated by $Zn_2SiO_4:Mn^{2+}$—**149** (4) G251

Zn_3N_2
The Electrochemistry of Zn_3N_2 and LiZnN A Lithium Reaction Mechanism for Metal Nitride Electrodes—**149** (3) A262

ZnNi
Residual Stress and Other Structural Characteristics of Electroplated ZnNi Alloys—**149** (5) C284
Cathodic Inhibition Effects during NiFe and ZnNi Alloy Deposition—**149** (11) C567

ZnO
Luminescent Polymer Electrolytes Prepared by Growing ZnO Nanoparticles in the Matrix of Polyethylene Glycol—**149** (5) H107

ZnSe
Photoluminescence and Photocapacitance of Se Vapor-Pressure-Dependent Deep Levels in Ga-Diffused Layers Formed in P-Type ZnSe Substrates—**149** (1) G100

$Zr(dmae)_4$
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23

$Zr(O^iPr)_2(thd)_2$
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49

Zr-2.5
Electrochemical Impedance of Anodic Oxide Films on Zr-2.5 Nb—**149** (4) B123

Zr-Based
Electrochemical Cycle Life of Zr-Based Laves Phase Alloys Influenced by Alloy Stoichiometry and Composition—**149** (5) A537

Zr-based
Ni/MH Rechargeable Battery with Zr-based Hydrogen Storage Alloy Electrode Modified by High Surface Area of Ni Powder—**149** (10) A1278

ZrO_2
Direct Liquid Injection Metallorganic Chemical Vapor Deposition of ZrO_2 Thin Films Using $Zr(dmae)_4$ as a Novel Precursor—**149** (1) C23
Physical and Electrical Characterization of ZrO_2 Gate Insulators Deposited on Si(100) Using $Zr(O^iPr)_2(thd)_2$ and O_2—**149** (6) F49
Changes in Aging Behavior and Defect Structure of Y_2O_3 Fully Stabilized
